Investment objective:	The investment objective of the scheme is to provide returns that closely correspond to the total returns of securities as represented by S & P BSE Sensex, subject to tracking errors. However there is no assurance that the objective of the scheme will be achieved.															
Asset Allocation Pattern for the Scheme:	LIC MF EXCHANGE TRADED FUND – SENSEX															
	<p>Under normal circumstances, the asset allocation pattern will be as follows:</p> <table border="1" data-bbox="418 285 1373 537"> <thead> <tr> <th data-bbox="427 285 837 348" rowspan="2">Instruments</th> <th colspan="2" data-bbox="846 285 1133 348">Indicative allocations (% of total assets)</th> <th data-bbox="1141 285 1365 348">Risk Profile</th> </tr> <tr> <th data-bbox="846 348 987 390">Minimum</th> <th data-bbox="995 348 1133 390">Maximum</th> <th data-bbox="1141 348 1365 390">High/Medium/Low</th> </tr> </thead> <tbody> <tr> <td data-bbox="427 390 837 453">Securities covered by the S & P BSE Sensex.</td> <td data-bbox="846 390 987 453">95</td> <td data-bbox="995 390 1133 453">100</td> <td data-bbox="1141 390 1365 453">Medium to High</td> </tr> <tr> <td data-bbox="427 453 837 537">Cash and cash equivalent /Money Market instruments including CBLO (with maturity not exceeding 91 days)</td> <td data-bbox="846 453 987 537">0</td> <td data-bbox="995 453 1133 537">5</td> <td data-bbox="1141 453 1365 537">Low</td> </tr> </tbody> </table> <p>Money Market Instruments include commercial papers, commercial bills, treasury bills, and Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, usance bills, CBLOs and any other like instruments as specified by the Reserve Bank of India from time to time.</p> <p>The net assets of the scheme will be invested predominantly in securities constituting the S & P BSE Sensex. This would be done by investing in all securities with the same weightage that they represent in the S & P BSE Sensex.</p> <p>A small portion of the net assets will be invested in Debt and money market instruments permitted by SEBI / RBI including call money market or in alternative investment for the call money market as may be provided by the RBI, to meet the liquidity requirements of the scheme.</p> <p>The scheme does not intend to invest in securitized debt instruments and foreign securities.</p> <p>The Scheme shall not engage in securities lending and borrowing.</p> <p>The scheme will not engage in short selling activities.</p> <p>The scheme would not invest in derivatives.</p> <p>Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and for defensive considerations only.</p> <p>Since, LIC MF ETF – SENSEX is a passively managed exchange traded open ended index scheme, therefore change in investment pattern is normally not foreseen. However, for short durations part of the corpus may be pending for deployment, in cases of extreme market conditions or special events.</p> <p>In the event of any deviations below the minimum limits or beyond the maximum limits as specified in the above table, the Fund Manager shall rebalance the portfolio within a period of 7 days. Also, the AMC shall ensure that in case of involuntary corporate action undertaken in the underlying securities, the portfolio will be rebalance within a period of 30 days.</p>	Instruments	Indicative allocations (% of total assets)		Risk Profile	Minimum	Maximum	High/Medium/Low	Securities covered by the S & P BSE Sensex.	95	100	Medium to High	Cash and cash equivalent /Money Market instruments including CBLO (with maturity not exceeding 91 days)	0	5	Low

Investment Strategy	<p>The Fund would invest not less than 95% of its corpus in securities comprising the S & P BSE Sensex and endeavor to track the benchmark index while minimizing the tracking error and therefore would follow a passive investment strategy. The scheme would aim to maintain least amount of cash & will also try & avoid investment in debt & money market securities. This would only be for the purpose of redemption requirements.</p> <p>Risk control measures</p> <p>Since investing requires disciplined risk management, the AMC would endeavor to incorporate adequate safeguards for controlling risks in the portfolio construction process. The Fund Manager will also review all counterparties prior to transacting, using internal guidelines. The fund manager shall follow the asset allocation pattern in SID under normal circumstances and residual cash may be invested in the collateralised borrowing & lending obligations (CBLO) / repo market, which seeks to ensure liquidity in the scheme under normal circumstances. There can however be no guarantee against liquidity issues within the scheme. The Fund Manager will also endeavour to actively manage the scheme duration based on the ensuing market conditions. Based on its interest outlook, the Fund Manager may take tactical and/or strategic interest rate calls to manage the investments of the scheme on a dynamic basis in order to exploit emerging opportunities in the market.</p> <p>The AMC may also implement certain internal control procedures / risk & exposure limits etc. for controlling risks which may be varied from time to time.</p>															

<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principle. Please read the SID Carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below :</p> <p>Equity and equity related risk : Equity instruments carry both company specific and market risks and hence no assurance of returns can be made for these investments.</p> <p>Investment in Debt and money market instruments is subject to credit risk, liquidity risk, interest rate risk, reinvestment risk etc.</p> <p>Risk associated with derivatives: Since investments would be made in derivatives such as options & futures, the risks associated with such derivatives would be applicable.</p> <p>Investment in securitized debt is subject to liquidity risk, limited recourse risk, Delinquency & Credit Risk, Risks due to possible prepayments, risk due to bankruptcy of the Originator or Seller etc.</p> <p>Passive Investments: As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.</p> <p>Tracking Error : While the objective of the Scheme is to closely track the index, the performance may not be commensurate with the performance of the underlying Index on any given day or over any given period. Such variations are commonly referred to as the tracking error.</p> <p>Tracking errors are inherent in any index fund and such errors may cause the scheme to generate returns which are not in line with the performance of the S & P BSE Sensex or one or more securities covered by / included in the S & P BSE Sensex and may arise from a variety of factors including but not limited to:</p> <ol style="list-style-type: none"> 1.Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realisation of sale proceeds and / or the registration of any securities transferred and / or any delays in receiving cash dividends and resulting delays in reinvesting them. 2.The S & P BSE Sensex reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the BSE & NSE. 3.The constituent securities of the underlying index may be revised periodically by either excluding or including new securities. In such an event, the Fund will endeavour to reallocate its portfolio but the available investment/ disinvestment opportunities may not permit precise mirroring of the underlying index in a short period of time. 4. The charging of expenses to the scheme including investment management fees and custodian fees. 5. The potential for trades to fail, which may result the Schemes not having acquired shares at a price necessary to track the index. 6. The holding of a cash position and accrued income prior to distribution and accrued expenses. 7. Disinvestments to meet redemptions, recurring expenses, etc. <p>AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal circumstances, such tracking errors are not expected to exceed above 2% per annum. However, this may vary due to the reasons mentioned above or any other reasons that may arise and particularly when the markets are very volatile. However, there can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Underlying Index.</p> <p>Sector Risk : The Scheme restricts its investments only in the Securities of the underlying index which represents a particular sector and will therefore be subject to the risks associated with such concentration. The banking sector, under certain market conditions, could underperform returns from Securities included in a broad market equity index or other asset classes. Also the number of stocks in S & P BSE Sensex is low and hence the concentration on a few large cap stocks could be significantly high. Due to such sector and stock specific concentration the Scheme could be exposed to higher levels of volatility and market risk than would generally be the case in a more diverse fund portfolio of equity Securities.</p> <p>Market Trading Risks: Investments in the scheme may be subject to the following market trading risks: Absence of a prior active market, lack of market liquidity, Units of the scheme may trade at prices other than NAV, Regulatory Risk, Right to Limit Redemptions, Redemption Risk, Asset Class Risk, Units to be held only through demat accounts.</p> <p>Risk specific to investing in S & P BSE Sensex : The Scheme restricts its investments only in the Securities of the S & P BSE Sensex which represents a particular sector and will therefore be subject to the risks associated with such concentration. The banking sector, under certain market conditions, could underperform returns from Securities included in a broad market equity index or other asset classes. Also the number of stocks in S & P BSE Sensex is low and hence the concentration on a few large cap stocks could be significantly high. Due to such sector and stock specific concentration the Scheme could be exposed to higher levels of volatility and market risk than would generally be the case in a more diverse fund portfolio of equity Securities.</p>

Based on its interest outlook, the Fund Manager may take tactical and/or strategic interest rate calls to manage the investments of the scheme on a dynamic basis in order to exploit emerging opportunities in the market.</p> <p>The AMC may also implement certain internal control procedures / risk & exposure limits etc. for controlling risks which may be varied from time to time.</p>
