1. INTRODUCTION

A. RISK FACTORS

STANDARD RISK FACTOR:

1. Mutual Fund and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved.
2. Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
3. As the price / value / interest rates of the securities in which the Scheme invest fluctuate, the value of your investment in the scheme may go up or down depending on the various factors and forces affecting government securities market and money markets.
4. Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme and may not necessarily provide a basis of comparison with other investments.
5. LIC MF ETF – NIFTY 100, is the name of the Scheme and do not, in any manner, indicate either the quality of the Scheme or their future prospects or returns.
6. The Sponsors are not responsible or liable for any loss resulting from the operation of the Schemes beyond the initial contribution of Rs. 2crs made by it towards setting up the Fund.
7. The present scheme is not guaranteed or assured return scheme.

SCHEME SPECIFIC RISK FACTOR:

- a. The Trustees, AMC, Fund, their directors or their employees shall not be liable for any tax consequences that may arise in the event that the scheme is wound up for the reasons and in the manner provided under the Scheme Information Document & Statement of Additional Information.
- b. Redemption by the unit holder due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustees, AMC, Fund their directors or their employees shall not be liable for any tax consequences that may arise.

- c. The tax benefits described in the SAI & SID are as available under the present taxation laws and are available subject to relevant condition. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India and the Investors and Unit Holders should be aware that the relevant fiscal rules or their interpretation may change. As in the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of the investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Investor / Unit holder is advised to consult his/her/its own professional tax advisor.
- d. LIC MF ETF NIFTY 100 would be investing in equities. money market instruments (such as CBLO or as defined by SEBI regulations, term/notice money market, repos, reverse repos and any alternative as may be directed by the RBI). The liquidity of the scheme's investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's investment portfolio, these periods may become significant. In view of the same, the Trustees have the right in their sole discretion to limit redemptions (including suspending redemptions) under certain circumstances.
- e. The Mutual Fund is not assuring any dividend nor is it assuring that it will make any dividend distributions. All dividend distributions are subject to the availability of distributable surplus and would depend on the performance of the scheme.
- f. Portfolio concentration risk : ETF being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager's decisions.

RISK FACTORS ASSOCIATED WITH INVESTMENTS IN EQUITY AND EQUITY RELATED SECURITIES:

- Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. The volatility in the value of the equity and equity related instruments is due to various micro and macro economic factors affecting the securities markets. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.
- The inability of the Scheme to make intended securities purchases due to settlement problems, could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances.
- Similarly, the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme, should there be a subsequent decline in the value of the securities held in the schemes portfolio.
- Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments. This may impact the ability of the unit holders to redeem their units. In view of this, the Trustee has the right, in its sole discretion to limit redemptions (including suspending redemptions) under certain circumstances.
- The AMC may invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.
- Investments in equity and equity related securities involve high degree of risks and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

RISKS ASSOCIATED WITH MARKET TRADING:

- **Absence of Prior Active Market:** Although the units of Exchange Traded Funds are listed on the Stock Exchange for trading, there can be no assurance that an active secondary market will develop or be maintained.
- **Lack of Market Liquidity:** Trading in units of Exchange Traded Funds on the Stock Exchange on which it is listed may be halted because of market conditions or for reasons that, in the view of the concerned Stock Exchange or Market Regulator, trading in the Exchange Traded Fund Units is inadvisable. In addition, trading in the units of Exchange Traded Funds is subject to trading halts caused by extraordinary market volatility pursuant to 'circuit breaker' rules. There can be no assurance that the requirements of the concerned Stock Exchange necessary to maintain the listing of the units of Exchange Traded Funds will continue to be met or will remain unchanged.
- **Units of Exchange Traded Funds May Trade at Prices Other than NAV:** Units of Exchange Traded Funds may trade above or below their NAV. The NAV of Units of Exchange Traded Funds may fluctuate with changes in the market value of a Scheme's holdings. The trading prices of units of Exchange Traded Fund will fluctuate in accordance with changes in their NAVs as well as market supply and demand. However, given that Exchange Traded

Funds can be created / redeemed in Creation Units, directly with the fund, large discounts or premiums to the NAVs will not sustain due to arbitrage possibility available.

- **Regulatory Risk:** Any changes in trading regulations by the Exchange or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV. Although LIC MF Exchange Traded Fund – NIFTY 100 are proposed to be listed on an Exchange, the AMC and the Trustees will not be liable for delay in listing of Units of the Scheme on Exchange / or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.
- **Political Risks:** Whereas the Indian market was formerly restrictive, a process of deregulation has been taking place over recent years. This process has involved removal of trade barriers and protectionist measures, which could adversely affect the value of investments. It is possible that the future changes in the Indian political situation, including political, social or economic instability, diplomatic developments and changes in laws and regulations could have an effect on the value of investments. Expropriation, confiscatory taxation or other relevant developments could affect the value of investments.
- **Right to Limit Redemptions:** The Trustee, in the general interest of the unit holders of the Scheme offered under this Offer Document and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day depending on the total “Saleable Underlying Stock” available with the fund.
- **Redemption Risk** – The Unit Holders may note that even though this is an open ended scheme, the Scheme would ordinarily repurchase Units in Creation Unit size. Thus unit holdings less than the Creation Unit size can normally only be sold through the secondary market, unless no quotes are available on the Exchange for 3 trading days consecutively.
- **Passive Investments:** As LIC MF Exchange Traded Fund – NIFTY 100 is not actively managed, the underlying investments may be affected by a general decline in the Indian markets relating to its Underlying Index. The scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to take defensive positions in declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis.

RISK FACTORS ASSOCIATED WITH INVESTMENTS IN FIXED INCOME SECURITIES:

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. However, debt securities in this scheme are intended to be held till maturity. For such securities held till maturity, there will not be any interest rate risk at the end of the tenure.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. e.g. corporate bonds carry a higher amount of risk than Government securities.

RISKS ASSOCIATED WITH SHORT SELLING AND SECURITIES LENDING & BORROWING:

The scheme will not indulge in any Stock Lending & borrowing and Short Selling activities.

RISKS ASSOCIATED WITH INVESTMENT IN ADR/GDR AND FOREIGN SECURITIES :

The scheme will not have any exposure in ADR/ GDR and foreign securities.

OTHER RISKS

Risk associated with inflation: Over time, yields of short-term investments may not keep pace with inflation, leading to a reduction in an investment's purchasing power.

Legal Risk: The scheme may be affected by the actions of government and regulatory bodies. Legislation could be imposed retrospectively or may be issued in the form of internal regulations which the public may not be aware of. Legislation (including legislation relating to tax) or regulation may be introduced which inhibits the scheme from pursuing their strategies or which renders an existing strategy less profitable than anticipated. Such actions may take any form, for example nationalization of any institution or restrictions on investment strategies in any given market sector or changing requirements and imposed without prior warning by any regulator.

Valuation Risk: This risk relates to the fact that markets, in specific situations and due to lack of volumes of transactions, do not enable an accurate assessment of the fair value of invested assets. In such cases, valuation risk represents the possibility that, when a financial instrument matures or is sold in the market, the amount received is less than anticipated, incurring a loss to the portfolio and therefore impacting negatively the NAV of the scheme.

Past performance of the Sponsor/ the AMC/ the Mutual Fund is not indicative of the future performance of the Scheme. LIC MF Exchange Traded Fund – NIFTY 100 is the name of the Scheme and does not in any manner indicate either the quality of the Scheme; its future prospects or returns.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

As per Circular number SEBI/IMD/CIR NO 10/22701/03 dated December 12, 2003, the above guidelines are not applicable for Exchange Traded Funds. As LIC MF Exchange Traded Fund – NIFTY 100 is an exchange traded fund, same is not applicable.

II. INFORMATION ABOUT THE SCHEME

A. NAME & TYPE OF THE SCHEME

LIC MF ETF – NIFTY 100 is An open ended scheme replicating/tracking Nifty 100 Index .

B. INVESTMENT OBJECTIVE OF THE SCHEME

The investment objective of the scheme is to provide returns that closely correspond to the total returns of securities as represented by NIFTY 100 INDEX, subject to tracking errors.

However there is no guarantee or assurance that the investment objective of the scheme will be achieved.

C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS

Under normal circumstances, the asset allocation pattern will be as follows:

Instruments	Indicative allocations (% of total assets)		Risk Profile
	Minimum	Maximum	High/Medium/Low
Securities covered by the NIFTY 100	95	100	Medium to High
Cash and cash equivalent /Money Market instruments including CBLO (with maturity not exceeding 91 days)	0	5	Low

Money Market Instruments include commercial papers, commercial bills, treasury bills, and Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, CBLOs and any other like instruments as specified by the Reserve Bank of India from time to time.

The net assets of the scheme will be invested predominantly in securities constituting the NIFTY 100 INDEX. This would be done by investing in all securities with the same weightage that they represent in the NIFTY 100 INDEX. A small portion of the net assets will be invested in Debt and money market instruments permitted by SEBI / RBI to meet the liquidity requirements of the scheme.

The scheme does not intend to invest in securitized debt instruments and foreign securities.

The scheme would not invest in derivatives.

The Scheme shall not engage in securities lending and borrowing.

The scheme will not engage in short selling activities.

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. . These proportions can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and for defensive considerations only.

Since, LIC MF ETF – NIFTY 100 is a passively managed exchange traded open ended index scheme, therefore change in investment pattern is normally not foreseen. However, for short durations part of the corpus may be pending for deployment, in cases of extreme market conditions or special events.

In the event of any deviations below the minimum limits or beyond the maximum limits as specified in the above table, the Fund Manager shall rebalance the portfolio within a period of 7 days. Also, the AMC shall ensure that in case of involuntary corporate action undertaken in the underlying securities, the portfolio will be rebalanced within a period of 30 days.

D. WHERE WILL THE SCHEME INVEST?

Investment in Equities and equity related instruments: The Scheme would invest in stocks comprising the NIFTY 100 INDEX in the same proportion (weightage) as in the Index and endeavour to track the benchmark index.

Investment in money market instrument: The Scheme may also invest in money market instruments, in compliance with Regulations to meet liquidity requirements. The scheme may also invest in liquid schemes of LIC Mutual Fund or of any other fund house. Money Market Instruments include commercial papers, treasury bills, and

Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, CBLOs and any other like instruments as specified by the Reserve Bank of India from time to time.

The liquid schemes launched by SEBI registered Mutual Fund or schemes that invest predominantly in money market instruments / securities.

The investment restrictions and limits are specified in Schedule VII of SEBI (MF) Regulations, 1996 which are mentioned under the heading 'Investment Restrictions'.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The Fund would invest not less than 95% of its corpus in securities comprising the NIFTY 100 INDEX and endeavour to track the benchmark index while minimizing the tracking error and therefore would follow a passive investment strategy. The scheme would aim to maintain least amount of cash & will also try & avoid investment in debt & money market securities. This would only be for the purpose of redemption requirements.

LIC MF ETF NIFTY 100 is a passively managed exchange traded fund which will employ an investment approach designed to track the performance of NIFTY 100 Index. The Scheme seeks to achieve this goal by investing in securities constituting the NIFTY 100 Index in same proportion as in the Index. The Scheme will invest at least 95% of its total assets in the securities comprising the Underlying Index. The Scheme may also invest in money market instruments to meet the liquidity and expense requirements.

The fund is ideal for those investors who would like to participate in the India growth story by passively investing in a well-diversified portfolio of well known companies as approximately represented by NIFTY 100 Index

Tracking Error

Tracking error is defined as the standard deviation of the difference between the daily returns of the Underlying Index and the NAV of the Scheme. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weights as the securities have in the Underlying Index. However, deviations from the stated index replication may occur due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to closely replicate the Underlying Index, etc. The Scheme's returns may therefore deviate from those of its Underlying Index. Tracking Error may arise due to the following reasons:

1. Fees and expenses of the Scheme.
2. Cash balance held by the Scheme due to dividend received subscriptions, redemption, etc.
3. Halt in trading on the stock exchange due to circuit filter rules.
4. Corporate actions
5. The Scheme has to invest in the securities in whole numbers and has to round off the quantity of securities shares.
6. Dividend payout.
7. Changes in the constituents of the underlying Index. Whenever there are any changes, the Scheme has to reallocate its investment as per the revised Index but market conditions may not offer an opportunity to rebalance its portfolio to match the Index and such delay may affect the NAV of the Scheme.

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed by 2% p.a. However, in case of events like, dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Basket, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

Risk Control

Since investing requires disciplined risk management, the AMC would endeavor to incorporate adequate safeguards for controlling risks in the portfolio construction process. The Fund Manager will also review all counterparties prior to transacting, using internal guidelines. The fund manager shall follow the asset allocation pattern in SID under normal circumstances and residual cash may be invested in the collateralised borrowing & lending obligations (CBLO) / repo market, which seeks to ensure liquidity in the scheme under normal circumstances. There can however be no guarantee against liquidity issues within the scheme.

The AMC may also implement certain internal control procedures / risk & exposure limits etc. for controlling risks which may be varied from time to time

Portfolio Turnover Policy

Generally, turnover will be confined to rebalancing of portfolio on account of change in the composition and corporate actions of NIFTY 100 Index.

F. ABOUT THE INDEX:

NIFTY 100 tracks the behaviour of combined portfolio of two indices viz. NIFTY 50 and NIFTY Next 50. It is a diversified 100 stock index accounting for 38 sectors of the economy.

NIFTY 100 is computed using free float market capitalization method wherein the level of the index reflects total free float market value of all the stocks in the index relative to a particular base market capitalization value. The method also takes into account constituent changes in the index and importantly corporate actions such as stock splits, rights, new issue of shares etc. without affecting the index value. The NIFTY 100 Index has a base date of Jan 1, 2003 and a base value of 1000. The maintenance of the NIFTY 50 and the NIFTY Next 50 are synchronized so that the two indices will always be disjoint sets i.e. a stock will never appear in both indices at the same time. Hence it is always meaningful to pool the NIFTY 50 and the NIFTY Next 50 into a composite 100 stocks index or portfolio.

Selection Criteria

NIFTY 100 index would comprise of the securities which are constituents of NIFTY 50 and NIFTY Next 50. In other words, this index is a combination of the NIFTY 50 and NIFTY Next 50. Any changes i.e. inclusion and exclusion of securities in NIFTY 50 and NIFTY Next 50 would be automatically mirrored in this index.

L. INTRODUCTION TO EXCHANGE TRADED FUND

A) Exchange Traded Fund (ETF)

Exchange Traded Funds are innovative products that provide exposure to an index or a basket of securities that trade on the exchange like a single stock. Exchange Traded Funds have a number of advantages over traditional open ended index funds as they can be bought and sold on the exchange at prices that are usually close to the actual intra-day NAV of the Scheme. Exchange Traded Funds are an innovation to traditional mutual funds as Exchange Traded Funds provide investors a fund that closely tracks the performance of an index with the ability to buy / sell on an intra-day basis. Unlike listed close ended funds, Exchange Traded Funds are structured in a manner which allows creating new units and redeeming outstanding units directly with the fund, thereby ensuring that Exchange Traded Funds trade close to their actual NAVs.

Exchange Traded Funds are usually passively managed funds wherein subscription / redemption of units work on the concept of exchange with underlying securities. In other words, large investors / institutions can purchase units by depositing the underlying securities with the fund / AMC and can redeem by receiving the underlying shares in exchange of units. Units can also be bought and sold directly on the exchange.

Exchange Traded Funds have all the benefits of indexing such as diversification, low cost and transparency. As Exchange Traded Funds are listed on the exchange, costs of distribution are much lower and the reach is wider. These savings in cost are passed on to the investors in the form of lower costs. Furthermore, exchange traded mechanism helps reduce minimal collection, disbursement and other processing charges.

The structure of Exchange Traded Funds is such that it protects long-term investors from inflows and outflows of short-term investor. This is because the fund does not bear extra transaction cost when buying / selling due to frequent subscriptions and redemptions.

Tracking Error of Exchange Traded Funds is likely to be low as compared to a normal index fund. Due to the Creation / Redemption of units through the in-kind mechanism the fund can keep lesser funds in cash. Also, time lag between buying / selling units and the underlying shares is much lower.

Exchange Traded Funds are highly flexible and can be used as a tool for gaining instant exposure to the equity markets, equitising cash or for arbitraging between the cash and futures market.

Benefits of EXCHANGE TRADED FUNDS

1. Can be easily bought / sold like any other stock on the exchange through terminals spread across the country.

2. Can be bought / sold anytime during market hours at prices that are expected to be close to actual NAV of the Scheme. Thus, investor invests at real-time prices as opposed to end of day prices.
3. No separate form filling for buying / selling units. It is just a phone call to your broker or a click on the net.
4. Ability to put limit orders.
5. Minimum investment for an Exchange Traded Fund is one unit.
6. Protects long-term investors from the inflows and outflows of short-term investors.
7. Flexible as it can be used as a tool for gaining instant exposure to the equity markets, hedging or for arbitraging between the cash and futures market.
8. Helps in increasing liquidity of underlying cash market.
9. Aids low cost arbitrage between Futures and Cash market.
10. An investor can get a consolidated view of his investments without adding too many different account statements, as Exchange Traded Funds will be in demat form.

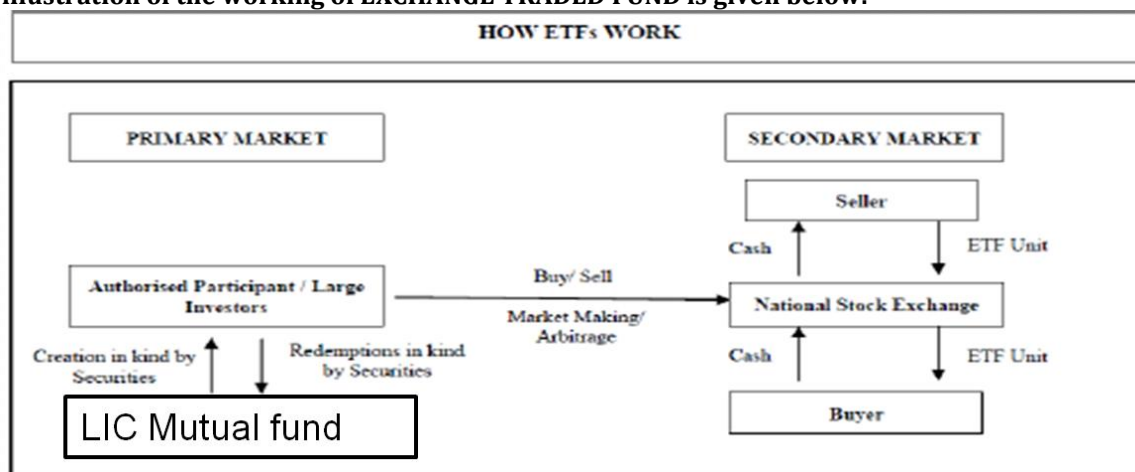

Uses of EXCHANGE TRADED FUNDS:

1. **Investors with a long-term horizon:** Allows diversification of portfolio at one shot, thereby reducing scrip specific risk at a low cost.
2. **FII, Institutions and Mutual Funds:** Allows easy asset allocation, hedging at a low cost.
3. **Arbitrage:** Low impact cost to carry out arbitrage between the Cash and the Futures market.
3. **Investors with a shorter term horizon:** Allows liquidity due to ability to trade during the day and expected to have quotes near NAV during the course of trading day.

Comparison of EXCHANGE TRADED FUNDS v/s Open Ended Funds v/s closes Ended Funds:

	Open Ended Fund	Closed Ended Fund	Exchange Traded Fund
Fund Size	Flexible	Fixed	Flexible
NAV	Daily	Daily	Real time (indicative NAV)
Liquidity provider	Fund itself	Stock Market	Stock Market / Fund itself
Sale price	At NAV plus load, if any	Significant premium / discount to NAV	Very close to actual NAV of Scheme

c) Certificate of Deposit (CD):

Certificate of Deposit (CD) is a negotiable money market instrument issued by scheduled commercial banks (SCBs) and select All India Financial Institutions (FIs), within their umbrella limit. The scheme introduced by RBI allows these institutions to mobilize bulk deposits from the market, which they can have at competitive rates of interest. The maturity period of CDs issued by the SCBs is between 7 days to 1 year. CDs also are issued at a discount to face value and can be traded in secondary market. Duplicate can be issued after giving a public notice & obtaining indemnity.

d) Collateralized Borrowing and Lending Obligations (CBLO):

Collateralized Borrowing and Lending Obligations (CBLO) is a money market instrument that enables entities to borrow and lend against sovereign collateral security. The maturity ranges from 1 day to 90 days and can also be made available up to 1 year. Central Government securities including Treasury Bills are eligible securities that can be used as collateral for borrowing through CBLO. These instruments benefit entities who have either been phased out from inter-bank call money market or have been given restricted participation in terms of ceiling on call borrowing and lending transactions and who do not have access to the call money market.

e) Commercial Paper (CP):

Commercial Paper (CP) is an unsecured negotiable money market instrument issued in the form of a promissory

note, generally issued by the corporates, primary dealers and All India Financial Institutions as an alternative source of short-term borrowings. f) Non Convertible Debentures and Bonds

Non convertible debentures as well as bonds are securities issued by companies / institutions promoted / owned by the Central or State Governments and statutory bodies which may or may not carry a guarantee. Nonconvertible debentures are unsecured bonds that cannot be converted to company equity or stock. Nonconvertible debentures usually have higher interest rates than convertible debentures. These instruments may be secured or unsecured against the assets of the Company and generally issued to meet the short term and long term fund requirements.

g) Floating Rate Debt Instruments

Floating rate debt instruments are instruments issued by Central / State Governments, corporates, PSUs, etc. with interest rates that are reset periodically, with rates tied to a representative interest rate index. Floating rate instruments offer enhanced yields when compared to a strategy of rolling over comparably rated short-term instruments and paying the related costs associated with each transaction. Floating-rate securities also allow investors to match asset and liability cash flows.

Activity in the Primary and Secondary Market is dominated by Central Govt. Securities including Treasury Bills. These instruments comprise close to 60% of the all outstanding debt and more than 75% of the daily trading volume on the wholesale Debt Market Segment of the National Stock Exchange of India Limited.

In the money market, activity levels of the Government and Non-Government Debt vary from time to time. Instruments that comprise a major portion of money market activity include Overnight Call, CBLO, Treasury Bills, Government Securities with a residual maturity of less than 1 year, Commercial Papers, Certificate of Deposit.

Apart from these, there are some other options available for short tenure investments that include MIBOR linked debentures with periodic exit options and other such instruments. The AMC should have in place sound internal liquidity management tools for schemes. Restriction on redemption cannot be used as an ordinary tool in order to manage the liquidity of a scheme. Further, restriction on redemption due to illiquidity of a specific security in the portfolio of a scheme due to a poor investment decision, shall not be allowed.</p> <p>ii. Market failures, exchange closures - when markets are affected by unexpected events which impact the functioning of exchanges or the regular course of transactions. Such unexpected events could also be related to political, economic, military, monetary or other emergencies.</p> <p>iii. Operational issues - when exceptional circumstances are caused by <i>force majeure</i>, unpredictable operational problems and technical failures (e.g. a black out). Such cases will only be considered if they are reasonably unpredictable and occur in spite of appropriate diligence of third parties, adequate and effective disaster recovery procedures and systems.</p> <p>b. Restriction on redemption may be imposed for a specified period of time not exceeding 10 working days in any 90 days period.</p> <p>c. Any imposition of restriction would require specific approval of Board of AMCs and Trustees and the same will be informed to SEBI immediately.</p> <p>d. When restriction on redemption is imposed, the following procedure shall be applied:</p> <p>i.No redemption requests upto INR 2 lakh shall be subject to restriction.</p> <p>ii.Where redemption requests are above INR 2 lakh, first INR 2 lakh shall be redeemed without any restriction and remaining part over and above INR 2 lakh shall be subject to the restriction.</p>
<p>Delay in payment of redemption / repurchase proceeds</p>	<p>The Asset Management shall be liable to pay interest to the unitholders at such rate as may be specified by SEBI for the period of such delay (presently @ 15% per annum)</p>
<p>Transfer Facility</p>	<p>Units of the scheme shall be available and compulsorily be issued/ repurchased and traded in dematerialized form.</p> <p>On listing, the Units of the scheme held in dematerialised form would be transferable. For effecting the transfer of Units held in electronic form, the Unitholders would be required to lodge delivery instructions for transfer of Units with the DP in the requisite form as may be required from time to time and the transfer will be effected in accordance with such rules/regulations as may be in force governing transfer of securities in dematerialised mode.</p> <p>If a person becomes a holder of the Units consequent to operation of law, or upon enforcement of a pledge, the Fund will, subject to production of satisfactory evidence, effect the transfer, if the transferee is otherwise eligible to hold the Units.</p> <p>Similarly, in cases of transfers taking place consequent to death, insolvency etc., the transferee's name will be recorded by the Fund subject to production of satisfactory evidence. No request for rematerialization of units of the scheme shall be accepted by Mutual Fund/AMC.</p>
<p>Cash Investments in Mutual Fund</p>	<p>In order to help enhance the reach of mutual fund products amongst small investors, who may not be tax payers and may not have PAN/bank accounts, such as farmers, small traders/businessmen/ workers, SEBI has permitted receipt of cash transactions for fresh purchases/ additional purchases to the extent of Rs. 50,000/- per investor, per financial year shall be allowed subject to: i. compliance with Prevention of Money Laundering Act, 2002 and Rules</p>
