

Methodology of calculating sale/repurchase prices

a) Methodology of calculating sale price

The price or NAV a unitholder is charged while investing in an open-ended scheme is called sale or subscription price. Pursuant to SEBI Circular No. SEBI /IMD/CIR No.4/168230/09 dated 30th June, 2009, no entry load will be charged by the scheme to the unitholders. Therefore, Sale or Subscription price = Applicable NAV.

b) Methodology of calculating repurchase price

Repurchase or redemption price is the price or NAV at which an open-ended scheme purchases or redeems its units from the Unitholders. It may include exit load, if applicable. The exit load, if any, shall be charged as a percentage of Net Assets Value (NAV) i.e. applicable load as a percentage of NAV will be deducted from the "Applicable NAV" to calculate the repurchase price. Therefore, Repurchase or Redemption Price = Applicable NAV *(1- Exit Load, if any)

For example, If the Applicable NAV of the Scheme is Rs.10 and the Exit Load applicable at the time of investment is 2% if redeemed before completion of 1 year from the date of allotment of units and the unitholder redeems units before completion of 1 year, then the repurchase or redemption price will be:

$$= \text{Rs. } 10 * (1-0.02)$$

$$=\text{Rs.}9.80$$
