TRUSTEE REPORT

1. Scheme Performance, Future Outlook and Operations of the Schemes

a. Performance of LIC Nomura MF Capital Protection Oriented Fund- Series 3

Scheme/Benchmark	6 Months	1Year	Since inception
Plans			
Direct Growth	5.69%	NA	10.48%
Regular Growth	5.42%	NA	9.98%
Benchmark-CRISIL MIP Blended Index			
Direct Growth	7.76%	NA	14.50%
Regular Growth	7.76%	NA	14.50%

Past performances may or may not be sustained in future.

b. Future Outlook:

(i) Debt Market outlook:

India Macro-Outlook on a Strong Footing:

India Macro Outlook appears to be getting healthier as growth pick up, benign inflation and stable external balance situation makes it conducive and most attractive investment destination from a Global perspective.

The growth trajectory of our economy seems to be gaining traction and is evidenced by a pick-up in Manufacturing activities.

Macro economic data points and indicators like IIP, Auto Sales, early signs of revival in Capex Cycle indicates we are at the nascent stage of recovery.

We are expecting the Real GDP growth at about 7.8% in FY16 vs 7.3% in FY15.

IIP:

India April IIP growth was seen at 4.1% and marks a strong start making us believe that a 5.6% IIP growth, which is about double the pace of 2.8% in FY15; is a possibility.

The April IIP has given a strong start for FY16 rising 4.1% YoY and is in line with the increase in indirect tax collections which saw an uptick of 12.6% (Excluding the effects of increase in fuel cess and removal of exemptions) for the cumulative two-months period of April-May FY16. The same is way higher than the annual target of growth rate in indirect tax collections of ~7.3% (Excluding the impact from higher cess)

Our estimates for FY16 average IIP stands at about 5.6%.

We expect the WPI Inflation to return in the positive trajectory by Nov'15 and start showing in the corporate results beginning from Q3FY16.

Growth matrix dependent on Legislative Reforms & Government spend

The central bank has already announced three interest rate cuts of 25 bps and may be on the path of another 50bps rate cut in the coming fiscal year. Other things remaining the same, we may hope to see further rate cuts in the range of about 100 bps in the coming few years, given its inflation mid-point target of 4% by end of FY18. As things stand now, the trajectory of interest rates in India is going to be downward in the medium term and thus unlikely to hurt the growth. The hurdles to growth emanates from legislative reforms involving creation of infrastructure (land acquisition clearances); uniform tax regime (implementing of GST); labour laws; ease of doing business are some of the elements which has the potentials to change the landscape of Indian growth scenario. However, the same gets substantially affected with an erratic monsoon as two-third of population remains dependent on the farm output.

Essentially, we believe that at this point in time, farm output and rural income is most critical to an increase in consumer spending along with the politically driven legislative reforms for a smooth ascending growth trajectory. In this parlance further cut in interest rates is only an enabling factor in reaching the potential output but not a precedent for driving the Capex cycle or giving a boost to consumption expenditure.

Government efforts to revive investments expected to continue

The renewed investment thrust for adding production capacity and improving the Indian infrastructure including Railways, Roads and Construction, Defense Production are some of the areas already seeing higher government spending allocation in the Union and Railway Budget 2015-16.

A 45% increase was noted in the new project announcements by the government at Rs.4607bn while the private sector investments stood at Rs.5414bn.

The Central Government's announcement for new projects amounted to Rs.3072bn, the most since FY10, State Government projects announcement saw an increase by 286% to Rs.1452bn. And it is prudent to expect further pick up in the pace of government announcement of new projects with the implementation of the Fourteenth Finance Commission Report where State Governments were given a larger share of tax revenues garnering additional allocation of Rs.1.86tn from the central taxes for FY16.

The Union Budget 2015-16 saw a quantum jump of Rs.491bn or 25.5% to Rs.2.41tn as the allocation for capital expenditure. The Railways Proposed investment Plan for 2015-19 is placed at Rs.8560bn and a plan outlay of Rs.1tn for FY16 itself will give a good start to the capital spending.

The easing in domestic interest rate cycle, decline in international commodity prices particularly energy and iron-ore, various efforts enabling the ease of doing business in India would propel and accelerate the investment cycle by the Private players in the coming period. The pick-up in Investment Cycle (net of shelved projects) is encouraging but is yet far from the levels seen in FY06 to FY11 when it averaged close to Rs.15tn.

Interest Rate Outlook

We believe there is room for additional 150 bps rate cut for the RBI in the coming fiscal year with RBI's target of CPI Inflation towards 4% by end of 2017-18. However for CY16 there may be room for further rate cut of about 25 bps depending on Monsoons and other data prints.

(ii) Outlook for equity markets:

Outlook for financial markets can be expected to be quite sanguine for FY2015-16 and our assessment is based on a medium term view of Indian economy and understanding of market cycles. Indian economy experienced one of the best periods of economic growth starting early 2000s—Indian economy grew by ~5X between FY00-12 in nominal terms. This phenomenal growth of the past decade led to cyclical pressures in terms of higher inflation, deterioration in external balances etc. and more importantly brought to the fore the structural changes required to be made by the Indian economy to grow for the next decade and beyond. India has made steady progress towards addressing these challenges since the past few years and the election of a new Central government with clear mandate in 2014 increases the probability of resolution of these issues. The recent correction in commodity prices provides additional headroom for the country to grow and correct its imbalances.

Recent government initiatives for allocating real resources, deregulation of diesel prices and enhanced spends on capex without compromising on fiscal discipline are good efforts to correct the challenges facing the economy. Thrust on completing stuck projects, reducing the bottlenecks is likely to ease cash flows for corporates and lead to an improved growth rate for the economy. Union Budget for 2015-16 had an innovative idea of setting up National Investment and Infrastructure Fund (NIIF) to leverage budgetary resources and fund infrastructure through the off-balance sheet route. Successful implementation of this idea has the potential to kick-start the capital investment cycle in India.

All economic booms typically result in overleveraged balance sheets in non-financial and/or financial sectors. This period is then followed by de-leveraging in the non-financial sector and consolidation and write-offs in the financial sector. Indian economy is currently witnessing all these trends and we have been almost 4 years since this phenomenon set in. A silver lining for the overleveraged balance sheets has been the high inflation during the past few years, which has effectively reduced debt burden for companies (unlike the western economies) but this has come at the cost of savers.

RBI's tight monetary stance over the few years, where the broad money supply (M3) has grown at ~13% CAGR between 2011-15 against a 20-year average of ~17% CAGR, has played a role in the moderation of inflationary pressures and resulted in better real returns for savers. Debt markets have already seen the impact of lower inflation, with the benchmark 10-year Gsec yield falling by ~90 bps in CY2014. We expect the moderation in inflationary pressures to persist aided by better policy (both fiscal and monetary) and softer commodity prices.

Equity market valuations are close to their historical valuations despite the strong run-up of the previous year and corporate profitability remaining below the historical levels. These factors are likely to help deliver healthy returns for investors over the medium term (over a 3-5 year period) on a tax-adjusted basis. Investors are advised to use the corrections to buy into equities and create wealth for themselves over the medium term.

c. Operations of the schemes:

As per Monthly Cumulative report (MCR) of March 2015 shared with SEBI, LIC Nomura Mutual fund manages 48 schemes (19 open ended, 25 Close ended and 4 Interval Schemes), out of which 29 are Debt, 1 Liquid, 1 Gilt, 15 Equity (2 ELSS) 1 Balanced Scheme and 1 Exchange Traded Fund.

INDEPENDENT AUDITOR'S REPORT

To the Trustees of
LIC NOMURA MUTUAL FUND

Report on the Financial Statements

We have audited the accompanying financial statements of the scheme mentioned below, which comprise the balance sheet as at March 31, 2015, the revenue account and cash flow statement, where applicable, for the period as mentioned below, and a summary of significant accounting policies and other explanatory information.

Name of the Scheme	Period covered by revenue account and cash flow statement
LIC Nomura MF Capital Protection Oriented Fund Series 3	May 9, 2014 to March 31, 2015

Management's Responsibility for the Financial Statements

Management of LIC Nomura Mutual Fund Asset Management Company Limited, the scheme's asset manager, is responsible for the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows, where applicable, of the Scheme in accordance with accounting principles generally accepted in India, including the accounting policies and standards specified in the Ninth Schedule to the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 ('the SEBI Regulations'). This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the SEBI Regulations in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

- in the case of the balance sheet, of the state of affairs of the Scheme as at March 31, 2015;
- in the case of the revenue account, of the surplus for the period as mentioned above; and
- in the case of the cash flow statement, where applicable, of the cash flows for the period as mentioned above.

Report on Other Legal and Regulatory Requirements

- We have obtained all the information and explanations, which to the best of our knowledge and belief were necessary for the purposes of our audit.
- The balance sheet, revenue account and cash flow statement, where applicable, dealt with by this report are in agreement with the books of account.
- In our opinion, the balance sheet and revenue account dealt with by this report have been prepared in conformity with the accounting policies and standards specified in the Ninth Schedule to the SEBI Regulations.
- In our opinion, and on the basis of information and explanations given to us, the methods used to value non traded securities as at March 31, 2015 are in accordance with the SEBI Regulations and other guidelines issued by the Securities and Exchange Board of India, as applicable, and approved by the Board of Trustees, and are fair and reasonable.
