Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Banking and Financial Services Fund	0.87%	0.82%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Banking and Financial Services Fund	1,201.77	4.37%	2,354.65	8.58%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Banking and Financial Services Fund	691.04	2.52%	694.38	2.53%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Banking and Financial Services Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	19.0404	18.8430
Regular Plan - IDCW Option	19.0370	18.8397
Direct Plan - Growth Option	21.6837	21.1808
Direct Plan - IDCW Option	21.5345	21.0416

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Banking and Financial Services Fund							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	22,509.23	-	-	22,509.23	23,994.79	-	-	23,994.79

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Banking and Financial Services Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	880.58	880.58	1,136.40	1,136.40
Bank balance other than cash and cash equivalents*	13.03	13.03	18.80	18.80
Other financial assets*

Other payables	31.01	31.01	0.30	0.30
Other financial liabilities**				
Management fee payable	28.19	28.19	32.03	32.03
Commission to distributors payable	30.71	30.71	28.22	28.22
Others	9.13	9.13	14.38	14.38
Total	**133.66**	**133.66**	**80.43**	**80.43**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	**LIC MF Banking and Financial Services Fund**	
	As at March 31, 2026	**As at March 31, 2025**
Equity shares	22,509.23	23,994.79

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	**Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities**		**Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities**	
	As at March 31, 2026	**As at March 31, 2025**	**As at March 31, 2026**	**As at March 31, 2025**
LIC MF Banking and Financial Services Fund	1,125.49	1,199.82	(1,125.49)	(1,199.82)

(b) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	**Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%**		**Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%**	
	As at March 31, 2026	**As at March 31, 2025**	**As at March 31, 2026**	**As at March 31, 2025**
LIC MF Banking and Financial Services Fund	0.02	0.08	(0.02)	(0.08)

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Banking and Financial Services Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets						
Cash and cash equivalents	880.58	-	-	-	-	880.58
Total interest bearing assets	**880.58**	**-**	**-**	**-**	**-**	**880.58**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	1,136.40	-	-	-	-	1,136.40
Total interest bearing assets	**1,136.40**	**-**	**-**	**-**	**-**	**1,136.40**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) Credit quality analysis

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) Concentration of credit risk

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) Collateral and other credit enhancements, and their financial effect

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Banking and Financial Services Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	65.63	-	-	-	65.63
Other financial liabilities	68.03	-	-	-	68.03
	133.66	**-**	**-**	**-**	**133.66**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	5.80	-	-	-	5.80
Other financial liabilities	74.63	-	-	-	74.63
	80.43	**-**	**-**	**-**	**80.43**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	LIC MF Banking and Financial Services Fund		
	Within 12 months	After 12 months	Total

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Value Fund (Erstwhile LIC MF Long Term Value Fund)	LIC MF Value Fund	An open ended equity scheme following value investment strategy	The investment objective of the scheme is to generate long-term capital appreciation along with regular income by investing predominantly in equity and equity related instruments by following value investing strategy. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - August 20, 2018 Direct Plan - August 20, 2018	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements

LIC MUTUAL FUND
For the year ended March 31, 2026

and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Value Fund	0.90%	1.19%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Value Fund	856.90	4.68%	368.08	2.83%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Value Fund	583.32	3.19%	385.44	2.96%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Value Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	22.5660	22.0231
Regular Plan - IDCW Option	22.5661	22.0233
Direct Plan - Growth Option	24.4747	23.5977
Direct Plan - IDCW Option	24.4509	23.5801

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Value Fund							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	16,400.82	-	-	16,400.82	14,478.23	-	-	14,478.23

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Value Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	1,758.56	1,758.56	396.54	396.54
Bank balance other than cash and cash equivalents*	12.49	12.49	15.42	15.42
Other financial assets*				
Dividend receivable	-	-	0.98	0.98
Others	19.00	19.00	14.02	14.02
Total	**1,790.05**	**1,790.05**	**426.96**	**426.96**
Financial liabilities:				
Payables

Contract for purchase of investments	-	-	26.47	26.47
Other payables	1.55	1.55	0.10	0.10
Other financial liabilities**				
Management fee payable	2.22	2.22	27.90	27.90
Commission to distributors payable	24.40	24.40	14.03	14.03
Others	10.97	10.97	13.77	13.77
Total	**43.96**	**43.96**	**89.92**	**89.92**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Value Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	16,400.82	14,478.23

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Value Fund	820.14	724.09	(820.14)	(724.09)

(b) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Value Fund	0.05	0.03	(0.05)	(0.03)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Value Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets						
Cash and cash equivalents	1,758.56	-	-	-	-	1,758.56
Total interest bearing assets	**1,758.56**	**-**	**-**	**-**	**-**	**1,758.56**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	396.54	-	-	-	-	396.54
Total interest bearing assets	**396.54**	**-**	**-**	**-**	**-**	**396.54**

LIC MUTUAL FUND
Notes to Financial Statements as at March 31, 2026
(All amount in lakhs, unless otherwise stated)

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) Credit quality analysis

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) Concentration of credit risk

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) Collateral and other credit enhancements, and their financial effect

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) Expected credit loss principles

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Value Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	6.37	-	-	-	6.37
Other financial liabilities	37.59	-	-	-	37.59
	43.96	**-**	**-**	**-**	**43.96**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	34.22	-	-	-	34.22
Other financial liabilities	55.70	-	-	-	55.70
	89.92	**-**	**-**	**-**	**89.92**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

Balance of unit capital at the end of the period	21,75,16,497.560	21,751.65	17,40,56,895.563	17,405.69

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Dividend Yield Fund	LIC MF Dividend Yield Fund	An open ended equity scheme predominantly investing in dividend yielding stocks	The Investment objective of the Scheme is to provide long term capital appreciation by investing predominantly in dividend yielding equity and equity related instruments. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - December 21, 2018 Direct Plan - December 21, 2018	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial

LIC MUTUAL FUND
For the year ended March 31, 2026

Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Dividend Yield Fund	0.52%	0.69%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Dividend Yield Fund	(2,541.65)	(4.04%)	394.12	1.08%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Dividend Yield Fund	1,587.04	2.52%	1,020.71	2.80%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Dividend Yield Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	26.6160	28.0177
Regular Plan - IDCW Option	26.6154	28.0172
Direct Plan - Growth Option	29.1923	30.2408
Direct Plan - IDCW Option	29.1784	30.2297

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Dividend Yield Fund							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	57,283.03	-	-	57,283.03	47,812.73	-	-	47,812.73

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Dividend Yield Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:

Total	**358.10**	**358.10**	**175.66**	**175.66**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) *Price risks*

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	**LIC MF Dividend Yield Fund**	
	As at March 31, 2026	**As at March 31, 2025**
Equity shares	57,283.03	47,812.73

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	**Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities**		**Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities**	
	As at March 31, 2026	**As at March 31, 2025**	**As at March 31, 2026**	**As at March 31, 2025**
LIC MF Dividend Yield Fund	2,864.19	2,389.74	(2,864.19)	(2,389.74)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	**Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%**		**Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%**	
	As at March 31, 2026	**As at March 31, 2025**	**As at March 31, 2026**	**As at March 31, 2025**
LIC MF Dividend Yield Fund	0.04	0.09	(0.04)	(0.09)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	**LIC MF Dividend Yield Fund**					
	0-3 months	**3-6 months**	**6 months-1 year**	**1-5 years**	**More than 5 years**	**Total**
As at March 31, 2026

Cash and cash equivalents	1,281.96	-	-	-	-	1,281.96
Total interest bearing assets	**1,281.96**	**-**	**-**	**-**	**-**	**1,281.96**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	1,300.83	-	-	-	-	1,300.83
Total interest bearing assets	**1,300.83**	**-**	**-**	**-**	**-**	**1,300.83**

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) Credit quality analysis

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) Concentration of credit risk

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) Collateral and other credit enhancements, and their financial effect

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) Expected credit loss principles

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Dividend Yield Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	224.50	-	-	-	224.50
Other financial liabilities	133.60	-	-	-	133.60
	358.10	**-**	**-**	**-**	**358.10**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	75.50	-	-	-	75.50
Other financial liabilities	100.16	-	-	-	100.16
	175.66	**-**	**-**	**-**	**175.66**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	LIC MF Dividend Yield Fund

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the “Mutual Fund”) has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Healthcare Fund	LIC MF Healthcare Fund	An open ended equity scheme investing in healthcare and allied sectors	The objective of the Scheme is to achieve long term capital appreciation by predominantly investing in equity and equity related instruments of companies engaged in Healthcare and Allied sectors. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - February 28, 2019 Direct Plan - February 28, 2019	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time (“the SEBI MF Regulations”). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (“the functional currency”). The Financial Statements are presented in Indian rupee (INR), which is Fund’s functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial

LIC MUTUAL FUND
For the year ended March 31, 2026

Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

  (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

  (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

  Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

  Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

  (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

  (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

  Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

  Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Healthcare Fund	0.82%	0.90%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Healthcare Fund	(34.99)	(0.41%)	1,199.03	16.27%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Healthcare Fund	204.63	2.41%	182.75	2.48%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Healthcare Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	27.3364	28.2729
Regular Plan - IDCW Option	27.3369	28.2734
Direct Plan - Growth Option	30.1125	30.7473
Direct Plan - IDCW Option	30.1035	30.7409

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Healthcare Fund							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	7,530.52	-	-	7,530.52	8,105.96	-	-	8,105.96

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

a) *Price risks*

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Healthcare Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	7,530.52	8,105.96

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Healthcare Fund	376.53	402.10	(376.53)	(402.10)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Healthcare Fund	0.01	0.02	(0.01)	(0.02)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Healthcare Fund					
	0-3 months	3-6 months	6 months- 1 year	1-5 years	More than 5 years	Total
As at March 31, 2026

Total interest bearing assets	**311.23**	**-**	**-**	**-**	**-**	**311.23**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	243.46	-	-	-	-	243.46
Total interest bearing assets	**243.46**	**-**	**-**	**-**	**-**	**243.46**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Healthcare Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	7.68	-	-	-	7.68
Other financial liabilities	15.44	-	-	-	15.44
	23.12	**-**	**-**	**-**	**23.12**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	68.10	-	-	-	68.10
Other financial liabilities	19.00	-	-	-	19.00
	87.10	**-**	**-**	**-**	**87.10**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Manufacturing Fund	LIC MF Manufacturing Fund	An open ended equity scheme following manufacturing theme	The investment objective of the Scheme is to achieve long term capital appreciation by predominantly investing in equity and equity related instruments of companies following manufacturing theme. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - October 11, 2024 Direct Plan - October 11, 2024	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements

LIC MUTUAL FUND
For the year ended March 31, 2026

and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 **Management and trusteeship fee**

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Manufacturing Fund	0.48%	0.33%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 **Income and expenditure**

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Manufacturing Fund	2,757.76	3.45%	(11,995.63)	(29.77%)

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Manufacturing Fund	1,837.85	2.30%	1,027.14	2.55%

25 **Net asset value per unit** *(all amounts in rupees)*

Options	LIC MF Manufacturing Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	9.1932	8.5884
Regular Plan - IDCW Option	9.1932	8.5884
Direct Plan - Growth Option	9.4182	8.6595
Direct Plan - IDCW Option	9.4182	8.6595

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 **Contingent liabilities**

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Unclaimed Redemptions of Old Redeemed Schemes	5,071.00	46,248	NA	NA

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Manufacturing Fund							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	59,502.59	-	-	59,502.59	74,729.46	-	-	74,729.46

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Manufacturing Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	5,867.46	5,867.46	1,500.69	1,500.69

Total	**331.72**	**331.72**	**710.26**	**710.26**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	**LIC MF Manufacturing Fund**	
	As at March 31, 2026	**As at March 31, 2025**
Equity shares	59,502.59	74,729.46

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	**Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities**		**Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities**	
	As at March 31, 2026	**As at March 31, 2025**	**As at March 31, 2026**	**As at March 31, 2025**
LIC MF Manufacturing Fund	2,975.29	3,718.66	(2,975.29)	(3,718.66)

(b) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	**Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%**		**Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%**	
	As at March 31, 2026	**As at March 31, 2025**	**As at March 31, 2026**	**As at March 31, 2025**
LIC MF Manufacturing Fund	0.16	0.10	(0.16)	(0.10)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	**LIC MF Manufacturing Fund**					
	0-3 months	**3-6 months**	**6 months-1 year**	**1-5 years**	**More than 5 years**	**Total**
As at March 31, 2026

Total interest bearing assets	**5,867.46**	**-**	**-**	**-**	**-**	**5,867.46**

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Particulars	LIC MF Manufacturing Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	1,500.69	-	-	-	-	1,500.69
Total interest bearing assets	**1,500.69**	**-**	**-**	**-**	**-**	**1,500.69**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Manufacturing Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	184.81	-	-	-	184.81
Other financial liabilities	146.91	-	-	-	146.91
	331.72	**-**	**-**	**-**	**331.72**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	534.31	-	-	-	534.31
Other financial liabilities	175.95	-	-	-	175.95
	710.26	**-**	**-**	**-**	**710.26**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	LIC MF Manufacturing Fund		
	Within 12 months	After 12 months	Total

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF BSE Sensex Index Fund (Erstwhile LIC MF S & P BSE Sensex Index Fund, Erstwhile LIC MF Index Fund - Sensex Plan)	LIC MF BSE Sensex Index Fund	An open ended scheme replicating/ tracking Sensex Index	The main investment objective of the fund is to generate returns commensurate with the performance of the index BSE Sensex based on the plans by investing in the respective index stocks subject to tracking errors. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - December 05, 2002 Direct Plan - January 01, 2013	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial

LIC MUTUAL FUND
For the year ended March 31, 2026

Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. **Fair value measurement**

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF BSE Sensex Index Fund	0.52%	0.32%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF BSE Sensex Index Fund	(510.92)	(5.69%)	396.79	4.81%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF BSE Sensex Index Fund	76.65	0.85%	52.69	0.64%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF BSE Sensex Index Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	134.3258	144.3673
Regular Plan - IDCW Option	46.0411	49.4829
Direct Plan - Growth Option	144.4867	154.5891
Direct Plan - IDCW Option	48.4395	51.8289

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND
Notes to Financial Statements as at March 31, 2026

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	**LIC MF BSE Sensex Index Fund**							
	As at March 31, 2026				**As at March 31, 2025**			
	Level 1	**Level 2**	**Level 3**	**Total**	**Level 1**	**Level 2**	**Level 3**	**Total**
Equity shares	8,445.14	-	-	8,445.14	8,405.11	-	-	8,405.11

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	**LIC MF BSE Sensex Index Fund**			
	As at March 31, 2026		**As at March 31, 2025**	
	Amortized cost	**Total**	**Amortized cost**	**Total**
Financial assets:				
Cash and cash equivalents*	81.77	81.77	24.82	24.82
Bank balance other than cash and cash equivalents*	475.81	475.81	7.58	7.58

Other payables	-	-	0.28	0.28
Other financial liabilities**				
Management fee payable	9.39	9.39	15.84	15.84
Commission to distributors payable	4.85	4.85	4.06	4.06
Others	3.23	3.23	4.58	4.58
Total	**497.54**	**497.54**	**32.92**	**32.92**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF BSE Sensex Index Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	8,445.14	8,405.11

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF BSE Sensex Index Fund	422.26	420.33	(422.26)	(420.33)

(b) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF BSE Sensex Index Fund	-	-	-	-

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF BSE Sensex Index Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026

Cash and cash equivalents	24.82	-	-	-	-	24.82
Total interest bearing assets	**24.82**	**-**	**-**	**-**	**-**	**24.82**

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF BSE Sensex Index Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	480.07	-	-	-	480.07
Other financial liabilities	17.47	-	-	-	17.47
	497.54	**-**	**-**	**-**	**497.54**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	8.44	-	-	-	8.44
Other financial liabilities	24.48	-	-	-	24.48
	32.92	**-**	**-**	**-**	**32.92**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	LIC MF BSE Sensex Index Fund		
	Within 12 months	After 12 months	Total

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

43 Supplementary investment portfolio information and industrywise classification (refer **Annexure VI**)

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Nifty 50 Index Fund (Erstwhile LIC MF Index Fund - Nifty Plan)	LIC MF Nifty 50 Index Fund	An open ended scheme replicating/ tracking Nifty 50 Index	The main investment objective of the fund is to generate returns commensurate with the performance of the index Nifty based on the plans by investing in the respective index stocks subject to tracking errors. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - December 05, 2002 Direct Plan - January 01, 2013	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial

LIC MUTUAL FUND
For the year ended March 31, 2026

Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

    (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

    (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

    Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

    Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

    (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

    (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

    Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

    Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies ‘simplified approach’ which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme’s daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day’s closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Nifty 50 Index Fund	0.42%	0.25%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty 50 Index Fund	(1,466.43)	(4.28%)	1,102.26	3.51%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty 50 Index Fund	280.39	0.82%	204.83	0.65%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Nifty 50 Index Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	123.0918	129.5942
Regular Plan - IDCW Option	45.4082	47.8070
Direct Plan - Growth Option	133.1309	139.3907
Direct Plan - IDCW Option	49.0528	51.3628

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Nifty 50 Index Fund

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

LIC MUTUAL FUND
Notes to Financial Statements as at March 31, 2026
(All amount in lakhs, unless otherwise stated)

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Nifty 50 Index Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	33,343.78	31,519.34

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty 50 Index Fund	1,667.20	1,575.33	(1,667.20)	(1,575.33)

(b) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty 50 Index Fund	0.01	0.01	(0.01)	(0.01)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Nifty 50 Index Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total

Total interest bearing assets	**141.94**	**-**	**-**	**-**	**-**	**141.94**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

<u>Cash and cash equivalents</u>

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

<u>Contract for sale of investment in securities and derivative financial instruments receivable</u>

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

<u>Securities lending and borrowing</u>

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

<u>Investments in debt and money market securities</u>

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

<u>Derivatives</u>

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

<u>Derivatives</u>

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

<u>Securities lending and borrowing</u>

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	**LIC MF Nifty 50 Index Fund**				
	0-3 months	**3-6 months**	**6 months - 12 months**	**After 12 months**	**Total**
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	1,803.52	-	-	-	1,803.52
Other financial liabilities	66.15	-	-	-	66.15
	1,869.67	**-**	**-**	**-**	**1,869.67**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	135.20	-	-	-	135.20
Other financial liabilities	67.59	-	-	-	67.59
	202.79	**-**	**-**	**-**	**202.79**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Nifty 8-13 yr G-Sec ETF (Erstwhile LIC MF G-Sec Long Term Exchange Traded Fund) NSE Symbol: LICNETFGSC	LIC MF Nifty 8-13 yr G-Sec ETF	An open ended scheme replicating/ tracking Nifty 8-13 Yr. G-Sec Index. A relatively high interest rate risk and relatively low credit risk	The investment objective of the scheme is to provide returns that closely correspond to the total returns of securities as represented by Nifty 8-13 yr G-Sec Index, subject to tracking errors. There is no assurance that the objective of the scheme will be achieved.	Regular Plan - December 24, 2014 Direct Plan - NA	Growth Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

LIC MUTUAL FUND
For the year ended March 31, 2026

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

LIC MUTUAL FUND
For the year ended March 31, 2026

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from

LIC MUTUAL FUND
For the year ended March 31, 2026

valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

LIC MUTUAL FUND
For the year ended March 31, 2026

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Nifty 8-13 yr G-Sec ETF	0.10%	0.09%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty 8-13 yr G-Sec ETF	8,144.92	3.51%	18,753.05	8.36%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty 8-13 yr G-Sec ETF	395.46	0.17%	377.17	0.17%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Nifty 8-13 yr G-Sec ETF	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	28.4282	27.5533

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Nifty 8-13 yr G-Sec ETF							
	As at March 31, 2026				As at March 31, 2025

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) *Price risks*

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Nifty 8-13 yr G-Sec ETF	
	As at March 31, 2026	As at March 31, 2025
Central government securities	2,19,163.54	2,40,308.15

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty 8-13 yr G-Sec ETF	7,433.72	8,042.55	(7,433.72)	(8,042.55)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty 8-13 yr G-Sec ETF	7,433.72	8,042.55	(7,433.72)	(8,042.55)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Total interest bearing liabilities	**5,236.72**	**-**	**-**	**-**	**-**	**5,236.72**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

As at March 31, 2026, the Scheme was invested in corporate debt and money market securities with the following credit quality. The ratings are provided by credit rating agencies.

Credit ratings	LIC MF Nifty 8-13 yr G-Sec ETF			
	As at March 31, 2026		As at March 31, 2025	
	Amount	% of net assets	Amount	% of net assets
Sovereign	2,19,163.54	96.78%	2,40,308.15	97.24%

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures were concentrated in the following industries.

Particulars	LIC MF Nifty 8-13 yr G-Sec ETF	
	As at March 31, 2026	As at March 31, 2025
Banks	-	-
Construction	-	-
Finance	-	-
Government Of India	96.78%	97.24%
Industrial Products	-	-
Petroleum Products	-	-
Power	-	-
Realty	-	-
	96.78%	**97.24%**

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Nifty 8-13 yr G-Sec ETF				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Other financial liabilities	51.34	-	-	-	51.34
	51.34	**-**	**-**	**-**	**51.34**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	5,236.72	-	-	-	5,236.72
Other financial liabilities	58.94	-	-	-	58.94
	5,295.66	**-**	**-**	**-**	**5,295.66**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Nifty 50 ETF (Erstwhile LIC MF Exchange Traded Fund - Nifty 50) NSE Symbol: LICNETFN50 BSE Scrip Code: 539480	LIC MF Nifty 50 ETF	An open ended scheme replicating/ tracking Nifty 50 Index	The investment objective of the scheme is to provide returns that, closely correspond to the total returns of the securities as represented by the NIFTY 50 Index, subject to tracking errors. There is no assurance that the objective of the scheme will be achieved.	Regular Plan - November 20, 2015 Direct Plan - NA	Growth Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial

LIC MUTUAL FUND
For the year ended March 31, 2026

Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund’s Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the “Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds” as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund’s financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as "below investment grade" if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as "default" if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to "default" grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Nifty 50 ETF	0.02%	0.01%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty 50 ETF	(3,391.88)	(3.86%)	5,088.86	6.24%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214
Unclaimed Redemptions of Old Redeemed Schemes	5,071.00	46,248	NA	NA

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

Distributable surplus	**33,766.60**	**30,601.78**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Nifty 50 ETF							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	79,513.41	-	-	79,513.41	81,650.64	-	-	81,650.64

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Nifty 50 ETF			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	424.71	424.71	280.46	280.46
Bank balance other than cash and cash equivalents*	3.67	3.67	3.58	3.58
Other financial assets*				
Others	9.26	9.26	9.23	9.23
Total	**437.64**	**437.64**	**293.27**	**293.27**
Financial liabilities:				
Payables				
Contract for purchase of investments	-	-	552.40	552.40
Other financial liabilities**				
Management fee payable	19.15	19.15	9.87	9.87
Commission to distributors payable	-	-	0.01	0.01
Others	5.58	5.58	6.72	6.72
Total	**24.73**	**24.73**	**569.00**	**569.00**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Nifty 50 ETF	
	As at March 31, 2026	As at March 31, 2025
Equity shares	79,513.41	81,650.64

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty 50 ETF	3,975.68	4,082.54	(3,975.68)	(4,082.54)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty 50 ETF	0.01	0.02	(0.01)	(0.02)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Nifty 50 ETF					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets						
Cash and cash equivalents	424.71	-	-	-	-	424.71
Total interest bearing assets	**424.71**	**-**	**-**	**-**	**-**	**424.71**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	280.46	-	-	-	-	280.46
Total interest bearing assets	**280.46**	**-**	**-**	**-**	**-**	**280.46**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty. The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	**LIC MF Nifty 50 ETF**				
	0-3 months	**3-6 months**	**6 months - 12 months**	**After 12 months**	**Total**
As at March 31, 2026					
Non-derivative financial liabilities					
Other financial liabilities	24.73	-	-	-	24.73
	24.73	**-**	**-**	**-**	**24.73**

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Particulars	LIC MF Nifty 50 ETF				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	552.40	-	-	-	552.40
Other financial liabilities	16.60	-	-	-	16.60
	569.00	**-**	**-**	**-**	**569.00**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 **General information**

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF BSE Sensex ETF (Erstwhile LIC MF S & P BSE Sensex ETF, Erstwhile LIC MF Exchange Traded Fund – Sensex) NSE Symbol: LICNETFSEN BSE Scrip Code: 539487	LIC MF BSE Sensex ETF	An open ended scheme replicating/ tracking BSE Sensex Index	The investment objective of the scheme is to provide returns that, closely correspond to the total returns of the securities as represented by the BSE SENSEX by holding BSE SENSEX stocks in same proportion, subject to tracking errors. There is no assurance that the objective of the scheme will be achieved.	Regular Plan - November 30, 2015 Direct Plan - NA	Growth Option

2 **Basis of preparation and presentation**

2.1 **Statement of compliance**

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) **Presentation of Financial Statements**

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) **Provisions and contingent liabilities**

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 **Functional and presentational currency**

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 **Basis of measurement**

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 **Significant accounting judgments, estimates and assumptions**

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial

LIC MUTUAL FUND
For the year ended March 31, 2026

Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

Total	**63.11**	**77.44**

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF BSE Sensex ETF	0.04%	0.03%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF BSE Sensex ETF	(3,903.62)	(4.99%)	4,722.45	5.85%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF BSE Sensex ETF	104.41	0.13%	106.48	0.13%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF BSE Sensex ETF	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	807.2918	859.9150

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214
Unclaimed Redemptions of Old Redeemed Schemes	5,071.00	46,248	NA	NA

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

Distributable surplus	**26,376.92**	**22,903.92**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

LIC MUTUAL FUND
Notes to Financial Statements as at March 31, 2026
(All amount in lakhs, unless otherwise stated)

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF BSE Sensex ETF							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	66,560.66	-	-	66,560.66	76,618.23	-	-	76,618.23

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF BSE Sensex ETF			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	25.65	25.65	193.66	193.66
Bank balance other than cash and cash equivalents*	2.06	2.06	2.17	2.17
Other financial assets*				
Others	4.87	4.87	4.86	4.86
Total	**32.58**	**32.58**	**200.69**	**200.69**
Financial liabilities:				
Payables				
Contract for purchase of investments	-	-	311.22	311.22
Other financial liabilities**				
Management fee payable	14.04	14.04	7.97	7.97
Commission to distributors payable	-	-	-	-
Others	7.90	7.90	11.52	11.52
Total	**21.94**	**21.94**	**330.71**	**330.71**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF BSE Sensex ETF	
	As at March 31, 2026	As at March 31, 2025
Equity shares	66,560.66	76,618.23

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF BSE Sensex ETF	3,328.03	3,830.90	(3,328.03)	(3,830.90)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF BSE Sensex ETF	-	0.01	-	(0.01)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF BSE Sensex ETF					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets						
Cash and cash equivalents	25.65	-	-	-	-	25.65
Total interest bearing assets	**25.65**	**-**	**-**	**-**	**-**	**25.65**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	193.66	-	-	-	-	193.66
Total interest bearing assets	**193.66**	**-**	**-**	**-**	**-**	**193.66**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty. The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	**LIC MF BSE Sensex ETF**				
	0-3 months	**3-6 months**	**6 months - 12 months**	**After 12 months**	**Total**
As at March 31, 2026					
Non-derivative financial liabilities					
Other financial liabilities	21.94	-	-	-	21.94
	21.94	**-**	**-**	**-**	**21.94**

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Particulars	LIC MF BSE Sensex ETF				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	311.22	-	-	-	311.22
Other financial liabilities	19.49	-	-	-	19.49
	330.71	**-**	**-**	**-**	**330.71**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

43 Supplementary investment portfolio information and industrywise classification (refer **Annexure VI**)

LIC MUTUAL FUND
For the year ended March 31, 2026

1 **General information**

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Nifty 100 ETF (Erstwhile LIC MF Exchange Traded Fund - Nifty 100) NSE Symbol: LICNFNHGP BSE Scrip Code: 539784	LIC MF Nifty 100 ETF	An open ended scheme replicating/ tracking Nifty 100 Index)	The investment objective of the scheme is to provide returns that closely correspond to the total returns of securities as represented by NIFTY 100 INDEX, subject to tracking errors. There is no assurance that the objective of the scheme will be achieved.	Regular Plan - March 17, 2016 Direct Plan - NA	Growth Option

2 **Basis of preparation and presentation**

2.1 **Statement of compliance**

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) **Presentation of Financial Statements**

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) **Provisions and contingent liabilities**

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 **Functional and presentational currency**

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 **Basis of measurement**

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 **Significant accounting judgments, estimates and assumptions**

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial

LIC MUTUAL FUND
For the year ended March 31, 2026

Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as "below investment grade" if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as "default" if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to "default" grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Loss on sale/ redemption of investments (Gross)	215.64	455.13
Total	**215.64**	**455.13**

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Note 22 : Expenses - Others

Particulars	LIC MF Nifty 100 ETF	
	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Custodian fees and expenses	5.61	8.84
Registrar fees and expenses	15.76	15.04
Marketing/ publicity/ advertisement expenses	0.35	0.33
Audit fees	0.70	0.66
Investor education and awareness expenses	3.73	6.92
Brokerage & transaction costs	13.01	9.80
Listing and license fees	10.58	9.74
Professional fee	3.77	3.80
Transaction processing fees	0.31	0.08
Other operating expense	1.99	1.45
Total	**55.81**	**56.66**

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Nifty 100 ETF	0.19%	0.18%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty 100 ETF	(2,635.11)	(3.53%)	1,742.60	2.46%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty 100 ETF	223.09	0.30%	207.88	0.29%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Nifty 100 ETF	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	249.4323	260.1520

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214
Unclaimed Redemptions of Old Redeemed Schemes	5,071.00	46,248	NA	NA

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

Distributable surplus	**17,230.73**	**14,778.57**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Nifty 100 ETF							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	66,479.46	-	-	66,479.46	69,897.72	-	-	69,897.72

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Nifty 100 ETF			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	356.76	356.76	126.61	126.61
Bank balance other than cash and cash equivalents*	2.43	2.43	5.14	5.14
Other financial assets*				
Interest accrued	-	-	-	-

Other payables	-	-	-	-
Other financial liabilities**				
Management fee payable	15.29	15.29	10.25	10.25
Commission to distributors payable	0.10	0.10	0.12	0.12
Others	6.73	6.73	9.19	9.19
Total	**22.12**	**22.12**	**123.62**	**123.62**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Nifty 100 ETF	
	As at March 31, 2026	As at March 31, 2025
Equity shares	66,479.46	69,897.72

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty 100 ETF	3,323.98	3,494.82	(3,323.98)	(3,494.82)

(b) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty 100 ETF	0.01	0.01	(0.01)	(0.01)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Nifty 100 ETF					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets						
Cash and cash equivalents	356.76	-	-	-	-	356.76
Total interest bearing assets	**356.76**	**-**	**-**	**-**	**-**	**356.76**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	126.61	-	-	-	-	126.61
Total interest bearing assets	**126.61**	**-**	**-**	**-**	**-**	**126.61**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

LIC MUTUAL FUND
Notes to Financial Statements as at March 31, 2026
(All amount in lakhs, unless otherwise stated)

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Nifty 100 ETF				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Other financial liabilities	22.12	-	-	-	22.12
	21.94	**-**	**-**	**-**	**21.94**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	104.06	-	-	-	104.06
Other financial liabilities	19.56	-	-	-	19.56
	123.62	**-**	**-**	**-**	**123.62**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	LIC MF Nifty 100 ETF		
	Within 12 months	After 12 months	Total
As at March 31, 2026			
Assets			
Financial assets			
Cash and cash equivalents	356.76	-	356.76

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

43 Supplementary investment portfolio information and industrywise classification (refer **Annexure VI**)

LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Nifty Next 50 Index Fund	LIC MF Nifty Next 50 Index Fund	An open ended scheme replicating/ tracking the NIFTY Next 50 Index (Total Returns Index)	The investment objective of the scheme is to invest only in and all the stocks comprising the NIFTY Next 50 Index in the same weights of these stocks as in the Index with the objective to replicate the performance of the Total Returns Index of NIFTY Next 50 Index. The scheme may also invest in derivatives instruments such as Futures and Options linked to stocks comprising the Index or linked to the NIFTY Next 50 Index. The scheme will adopt a passive investment strategy and will seek to achieve the investment objective by minimizing the tracking error between the NIFTY Next 50 Index (Total Returns Index) and the scheme. There is no assurance that the investment objective of the Scheme will be achieved. 2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period, as explained below.

LIC MUTUAL FUND
For the year ended March 31, 2026

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund’s Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the “Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds” as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund’s financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

LIC MUTUAL FUND
For the year ended March 31, 2026

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

LIC MUTUAL FUND
For the year ended March 31, 2026

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

LIC MUTUAL FUND
For the year ended March 31, 2026

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

LIC MUTUAL FUND
For the year ended March 31, 2026

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Nifty Next 50 Index Fund	0.22%	0.18%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty Next 50 Index Fund	(290.30)	(2.96%)	229.76	2.53%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty Next 50 Index Fund	74.35	0.76%	81.98	0.90%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Nifty Next 50 Index Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	44.7938	46.7005
Regular Plan - IDCW Option	44.7939	46.7005
Direct Plan - Growth Option	49.3236	51.1438
Direct Plan - IDCW Option	49.3235	51.1438

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214

(refer **Annexure V** for the outstanding borrowing as on year end).

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	**LIC MF Nifty Next 50 Index Fund**							
	As at March 31, 2026				**As at March 31, 2025**

Others	2.60	2.60	2.71	2.71
Total	**80.25**	**80.25**	**244.70**	**244.70**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) *Price risks*

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Nifty Next 50 Index Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	8,920.14	9,079.22

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty Next 50 Index Fund	446.01	454.38	(446.01)	(454.38)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty Next 50 Index Fund	0.00	0.02	-	(0.02)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Nifty Next 50 Index Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total

Cash and cash equivalents	268.45	-	-	-	-	268.45
Total interest bearing assets	**268.45**	**-**	**-**	**-**	**-**	**268.45**

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) Credit quality analysis

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) Concentration of credit risk

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) Collateral and other credit enhancements, and their financial effect

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) Expected credit loss principles

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Nifty Next 50 Index Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	60.10	-	-	-	60.10
Other financial liabilities	20.15	-	-	-	20.15
	80.25	**-**	**-**	**-**	**80.25**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	226.08	-	-	-	226.08
Other financial liabilities	18.62	-	-	-	18.62
	244.70	**-**	**-**	**-**	**244.70**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Gold Exchange Traded Fund NSE Symbol: LICMFGOLD BSE Scrip Code: 533719	LIC MF Gold Exchange Traded Fund	An open ended scheme replicating/ tracking the performance of gold in domestic prices	To invest in physical gold and gold related instruments with the objective to replicate the performance of gold in domestic prices. The ETF will adopt a passive investment strategy and will seek to achieve the investment objective by minimizing the tracking error between the Fund and the underlying asset. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - November 09, 2011	Growth Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect

LIC MUTUAL FUND
For the year ended March 31, 2026

the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Gold Exchange Traded Fund	0.16%	0.08%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Gold Exchange Traded Fund	9,475.21	12.12%	699.87	4.26%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Gold Exchange Traded Fund	322.36	0.41%	67.28	0.41%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Gold Exchange Traded Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	130.2691	8,202.8187

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Gold Exchange Traded Fund							
	As at March 31, 2026				As at March 31, 2025

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Gold Exchange Traded Fund	
	As at March 31, 2026	As at March 31, 2025
Gold	1,32,140.44	28,931.67

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Gold Exchange Traded Fund	-	-	-	-

(b) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Gold Exchange Traded Fund	-	-	-	-

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Gold Exchange Traded Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets						
Cash and cash equivalents	28.67	-	-	-	-	28.67
Total interest bearing assets	**28.67**	**-**	**-**	**-**	**-**	**28.67**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	64.45	-	-	-	-	64.45
Total interest bearing assets	**64.45**	**-**	**-**	**-**	**-**	**64.45**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

c) Collateral and other credit enhancements, and their financial effect

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) Expected credit loss principles

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	**LIC MF Gold Exchange Traded Fund**				
	0-3 months	**3-6 months**	**6 months - 12 months**	**After 12 months**	**Total**
As at March 31, 2026					
Non-derivative financial liabilities					
Other financial liabilities	34.28	-	-	-	34.28
	34.28	**-**	**-**	**-**	**34.28**
As at March 31, 2025					
Non-derivative financial liabilities					
Other financial liabilities	12.89	-	-	-	12.89
	12.89	**-**	**-**	**-**	**12.89**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

43 Supplementary investment portfolio information and industrywise classification (refer **Annexure VI**)

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the “Mutual Fund”) has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Gold ETF Fund of Fund	LIC MF Gold ETF Fund of Fund	An open ended Fund of Fund scheme investing in LIC MF Gold Exchange Traded Fund (LIC MF Gold ETF)	The investment objective of the Scheme will be to generate returns that correspond closely to the returns generated by LIC MF Gold Exchange Traded Fund (LIC MF Gold ETF). There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - August 14, 2012 Direct Plan - January 01,2013	Regular Plan - Growth Option Direct Plan - Growth Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time (“the SEBI MF Regulations”). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (“the functional currency”). The Financial Statements are presented in Indian rupee (INR), which is Fund’s functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period, as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

LIC MUTUAL FUND
For the year ended March 31, 2026

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. **Fair value measurement**

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

LIC MUTUAL FUND
For the year ended March 31, 2026

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

LIC MUTUAL FUND
For the year ended March 31, 2026

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

LIC MUTUAL FUND
For the year ended March 31, 2026

For receivables, the Fund applies ‘simplified approach’ which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme’s daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day’s closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Gold ETF Fund of Fund	0.27%	0.14%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Gold ETF Fund of Fund	325.87	0.80%	102.79	1.54%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Gold ETF Fund of Fund	202.22	0.49%	37.56	0.56%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Gold ETF Fund of Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	37.4233	23.5031
Direct Plan - Growth Option	39.5464	24.7458

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

LIC MUTUAL FUND
Notes to Financial Statements as at March 31, 2026
(All amount in lakhs, unless otherwise stated)

a) *Price risks*

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	**LIC MF Gold ETF Fund of Fund**	
	As at March 31, 2026	**As at March 31, 2025**
Exchange traded fund (ETF)	73,933.73	10,272.62

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	**Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities**		**Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities**	
	As at March 31, 2026	**As at March 31, 2025**	**As at March 31, 2026**	**As at March 31, 2025**
LIC MF Gold ETF Fund of Fund	3,696.69	516.02	(3,696.69)	(516.02)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	**Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%**		**Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%**	
	As at March 31, 2026	**As at March 31, 2025**	**As at March 31, 2026**	**As at March 31, 2025**
LIC MF Gold ETF Fund of Fund	0.01	0.01	(0.01)	(0.01)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	**LIC MF Gold ETF Fund of Fund**					
	0-3 months	**3-6 months**	**6 months-1 year**	**1-5 years**	**More than 5 years**	**Total**
As at March 31, 2026

Total interest bearing assets	**347.07**	**-**	**-**	**-**	**-**	**347.07**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	141.68	-	-	-	-	141.68
Total interest bearing assets	**141.68**	**-**	**-**	**-**	**-**	**141.68**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Gold ETF Fund of Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	516.15	-	-	-	516.15
Other financial liabilities	63.79	-	-	-	63.79
	579.94	**-**	**-**	**-**	**579.94**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	45.44	-	-	-	45.44
Other financial liabilities	23.89	-	-	-	23.89
	69.33	**-**	**-**	**-**	**69.33**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	LIC MF Gold ETF Fund of Fund

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Nifty Midcap 100 ETF NSE Symbol: LICNMID100 BSE Scrip Code: 544123	LIC MF Nifty Midcap 100 ETF	An open ended scheme replicating/ tracking Nifty Midcap 100 Total Return Index	The investment objective of the scheme is to provide returns that correspond to the total returns of securities as represented by Nifty Midcap 100 Total Return Index, subject to tracking errors. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - February 14, 2024 Direct Plan - NA	Growth Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period, as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial

LIC MUTUAL FUND
For the year ended March 31, 2026

Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund’s Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the “Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds” as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund’s financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

(i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

(ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

(i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

(ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Nifty Midcap 100 ETF	0.07%	0.07%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty Midcap 100 ETF	3,000.08	4.34%	2,625.52	4.02%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Nifty Midcap 100 ETF	169.67	0.25%	168.63	0.26%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Nifty Midcap 100 ETF	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	52.9302	51.7253

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214
Unclaimed Redemptions of Old Redeemed Schemes	5,071.00	46,248	NA	NA

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

Less : Credit balance in unit premium reserve at plan level	39,851.53	48,927.78
Distributable surplus	**5,173.17**	**1,924.82**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Nifty Midcap 100 ETF							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	55,855.03	-	-	55,855.03	64,005.92	-	-	64,005.92

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Nifty Midcap 100 ETF			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	175.88	175.88	524.71	524.71
Bank balance other than cash and cash equivalents*	3.96	3.96	26.29	26.29
Other financial assets*

Other payables	-	-	-	-
Other financial liabilities**				
Management fee payable	23.35	23.35	24.42	24.42
Commission to distributors payable	-	-	-	-
Others	6.35	6.35	8.62	8.62
Total	**29.70**	**29.70**	**603.36**	**603.36**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Particulars	LIC MF Nifty Midcap 100 ETF	
	As at March 31, 2026	As at March 31, 2025
Equity shares	55,855.03	64,005.92

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty Midcap 100 ETF	2,792.76	3,200.30	(2,792.76)	(3,200.30)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Nifty Midcap 100 ETF	0.00	0.04	-	(0.04)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Nifty Midcap 100 ETF					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets						
Cash and cash equivalents	175.88	-	-	-	-	175.88
Total interest bearing assets	**175.88**	**-**	**-**	**-**	**-**	**175.88**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	524.71	-	-	-	-	524.71
Total interest bearing assets	**524.71**	**-**	**-**	**-**	**-**	**524.71**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - Nil

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	**LIC MF Nifty Midcap 100 ETF**				
	0-3 months	**3-6 months**	**6 months - 12 months**	**After 12 months**	**Total**
As at March 31, 2026					
Non-derivative financial liabilities					
Other financial liabilities	29.70	-	-	-	29.70
	29.70	**-**	**-**	**-**	**29.70**

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Particulars	**LIC MF Nifty Midcap 100 ETF**				
	0-3 months	**3-6 months**	**6 months - 12 months**	**After 12 months**	**Total**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	570.32	-	-	-	570.32
Other financial liabilities	33.04	-	-	-	33.04
	603.36	**-**	**-**	**-**	**603.36**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	**LIC MF Nifty Midcap 100 ETF**

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Aggressive Hybrid Fund (Erstwhile LIC MF Equity Hybrid Fund, Erstwhile LIC MF Balanced Fund)	LIC MF Aggressive Hybrid Fund	An open ended hybrid scheme investing predominantly in equity and equity related instruments.	An open ended balanced scheme which seeks to provide regular returns and capital appreciation according to the selection of plan by investing in equities and debt. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - January 01, 1991 Direct Plan - January 03, 2013	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

LIC MUTUAL FUND
For the year ended March 31, 2026

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

LIC MUTUAL FUND
For the year ended March 31, 2026

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from

LIC MUTUAL FUND
For the year ended March 31, 2026

valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

LIC MUTUAL FUND
For the year ended March 31, 2026

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Aggressive Hybrid Fund	1.08%	1.10%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Aggressive Hybrid Fund	323.59	0.62%	5,159.44	9.79%

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Aggressive Hybrid Fund	1,372.62	2.62%	1,400.73	2.66%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Aggressive Hybrid Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	177.4461	182.0003
Regular Plan - IDCW Option	13.7574	15.3065

Direct Plan - IDCW Option	19.7674	20.0632

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214
Unclaimed Redemptions of Old Redeemed Schemes	5,071.00	46,248	NA	NA

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

Less : Credit balance in unit premium reserve at plan level	635.38	878.91
Distributable surplus	**39,386.96**	**36,808.59**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Aggressive Hybrid Fund							
	As at March 31, 2026				As at March 31, 2025

Total	**159.31**	**159.31**	**227.22**	**227.22**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Aggressive Hybrid Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	34,295.85	37,305.75
Debentures/ bonds	2,005.84	2,544.17
Central government securities	4,863.55	3,813.99
State government securities	2,517.16	4,719.91
Certificate of deposits	1,560.09	-

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Aggressive Hybrid Fund	2,093.22	2,298.76	(2,093.22)	(2,298.76)

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Aggressive Hybrid Fund	338.24	390.89	(338.24)	(390.89)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Aggressive Hybrid Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026

As at March 31, 2025						
Fixed rate assets						
Debt instruments	-	-	496.85	1,680.96	8,637.31	10,815.12
Cash and cash equivalents	1,085.85	-	-	-	-	1,085.85
Total interest bearing assets	**1,085.85**	**-**	**496.85**	**1,680.96**	**8,637.31**	**11,900.97**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

<u>Cash and cash equivalents</u>

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

<u>Contract for sale of investment in securities and derivative financial instruments receivable</u>

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

<u>Securities lending and borrowing</u>

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Investments in debt and money market securities

As at March 31, 2026, the Scheme was invested in corporate debt and money market securities with the following credit quality. The ratings are provided by credit rating agencies.

Credit ratings	LIC MF Aggressive Hybrid Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amount	% of net assets	Amount	% of net assets
AAA	2,005.84	4.26%	2,544.17	5.12%
A1+	1,560.09	3.32%	-	-
Sovereign	7,380.71	15.69%	8,533.91	17.16%

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures were concentrated in the following industries.

Particulars	LIC MF Aggressive Hybrid Fund	
	As at March 31, 2026	As at March 31, 2025
Banks	3.32%	-
Construction	1.07%	1.02%
Finance	-	1.00%
Government Of India	15.69%	17.16%
Power	3.19%	3.09%
	23.27%	**22.27%**

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Aggressive Hybrid Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	43.57	-	-	-	43.57
Other financial liabilities	115.74	-	-	-	115.74
	159.31	**-**	**-**	**-**	**159.31**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	115.63	-	-	-	115.63
Other financial liabilities	111.59	-	-	-	111.59
	227.22	**-**	**-**	**-**	**227.22**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

43 Supplementary investment portfolio information and industrywise classification (refer **Annexure VI**)

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Arbitrage Fund	LIC MF Arbitrage Fund	Open ended scheme	The investment objective of the scheme is to generate income by taking advantage of the arbitrage opportunities that potentially exists between cash and derivative market and within the derivative segment of the equity market along with investments in debt securities & money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - January 25, 2019 Direct Plan - January 25, 2019	Regular Plan - Growth Option Regular Plan - Weekly IDCW Option Regular Plan - Monthly IDCW Option Direct Plan - Growth Option Direct Plan - Weekly IDCW Option Direct Plan - Monthly IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect

LIC MUTUAL FUND
For the year ended March 31, 2026

the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Arbitrage Fund	0.16%	0.23%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Arbitrage Fund	537.16	2.32%	1,723.61	7.48%

LIC MUTUAL FUND
Notes to Financial Statements as at March 31, 2026
(All amount in lakhs, unless otherwise stated)

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Arbitrage Fund	247.82	1.07%	310.82	1.35%

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Arbitrage Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	14.4068	13.6042
Regular Plan - Weekly IDCW Option	13.9859	13.2066
Regular Plan - Monthly IDCW Option	14.0755	13.2914
Direct Plan - Growth Option	15.1386	14.1975
Direct Plan - Weekly IDCW Option	14.2257	13.3414
Direct Plan - Monthly IDCW Option	13.7633	12.9076

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 Contingent liabilities

As on 31 March 2026: Nil

As on 31 March 2025: Nil

27 Unclaimed IDCW and unclaimed redemption

Distributable surplus	**6,619.37**	**8,760.27**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Arbitrage Fund							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	14,048.63	-	-	14,048.63	21,592.14	-	-	21,592.14
Debentures/ bonds	-	2,002.80	-	2,002.80	-	1,504.15	-	1,504.15
Commercial paper	-	-	-	-	-	992.31	-	992.31

Others	4.30	4.30	10.01	10.01
Total	**671.97**	**671.97**	**78.38**	**78.38**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Arbitrage Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	14,048.63	21,592.14
Debentures/ bonds	2,002.80	1,504.15
Commercial paper	-	992.31
Certificate of deposits	-	950.92
Units of domestic mutual fund	4,372.33	6,936.51

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Arbitrage Fund	231.24	364.70	(231.24)	(364.70)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Arbitrage Fund	7.26	10.03	(7.26)	(10.03)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Arbitrage Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026

Debt instruments	499.62	-	-	999.71	-	1,499.33
Money market funds and similar securities	991.89	-	948.68	-	-	1,940.57
Cash and cash equivalents	572.67	-	-	-	-	572.67
Total interest bearing assets	**2,064.18**	**-**	**948.68**	**999.71**	**-**	**4,012.57**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

LIC MUTUAL FUND
Notes to Financial Statements as at March 31, 2026
(All amount in lakhs, unless otherwise stated)

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

As at March 31, 2026, the Scheme was invested in corporate debt and money market securities with the following credit quality. The ratings are provided by credit rating agencies.

Credit ratings	LIC MF Arbitrage Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amount	% of net assets	Amount	% of net assets
AAA	2,002.80	9.12%	501.11	1.52%
AA+	-	-	1,003.04	3.05%
A1+	-	-	1,943.24	5.90%

Derivatives

The table below shows an analysis of derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Arbitrage Fund			
	Derivative assets		Derivative liabilities	
	Fair value	Notional amount	Fair value	Notional amount
As at March 31, 2026				
Exchange-traded	(14,131.93)	(15,223.87)	(14,131.93)	(15,223.87)
Total	**(14,131.93)**	**(15,223.87)**	**(14,131.93)**	**(15,223.87)**
As at March 31, 2025				
Exchange-traded	(21,696.04)	(21,600.07)	(21,696.04)	(21,600.07)
Total	**(21,696.04)**	**(21,600.07)**	**(21,696.04)**	**(21,600.07)**

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures were concentrated in the following industries.

Particulars	LIC MF Arbitrage Fund	
	As at March 31, 2026	As at March 31, 2025
Banks	-	2.89%
Construction	-	-
Finance	9.12%	7.58%
Government Of India	-	-
Power	-	-
Transport Infrastructure	-	-
	9.12%	**10.47%**

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	**LIC MF Arbitrage Fund**				
	0-3 months	**3-6 months**	**6 months - 12 months**	**After 12 months**	**Total**
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	644.68	-	-	-	644.68
Other financial liabilities	27.29	-	-	-	27.29
Derivative financial liabilities					
Outflows	10.00	-	-	-	10.00
	681.97	**-**	**-**	**-**	**681.97**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	25.69	-	-	-	25.69
Other financial liabilities	52.69	-	-	-	52.69
Derivative financial liabilities					
Outflows	332.00	-	-	-	332.00
	410.38	**-**	**-**	**-**	**410.38**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	**LIC MF Arbitrage Fund**		
	Within 12 months	**After 12 months**	**Total**
As at March 31, 2026

Total (B)	**79.61**	**-**	**79.61**

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Conservative Hybrid Fund (Erstwhile LIC MF Debt Hybrid Fund, Erstwhile LIC MF Monthly Income Plan)	LIC MF Conservative Hybrid Fund	An open ended dynamic asset allocation fund	The investment objective of the Scheme is to generate regular income by investing mainly in a portfolio of quality debt securities and money market instruments. It also seeks to generate capital appreciation by investing some percentage in a mix of equity instruments. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan -June 01, 1998 Direct Plan - January 09, 2013	Regular Plan - Growth Option Regular Plan - Monthly IDCW Option Regular Plan - Quarterly IDCW Option Regular Plan - Yearly IDCW Option Direct Plan - Growth Option Direct Plan - Monthly IDCW Option Direct Plan - Quarterly IDCW Option Direct Plan - Yearly IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements

LIC MUTUAL FUND
For the year ended March 31, 2026

and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Conservative Hybrid Fund	1.36%	1.36%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Conservative Hybrid Fund	225.52	4.55%	395.95	7.83%

LIC MUTUAL FUND
Notes to Financial Statements as at March 31, 2026
(All amount in lakhs, unless otherwise stated)

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Conservative Hybrid Fund	110.82	2.24%	110.92	2.19%

25 **Net asset value per unit** *(all amounts in rupees)*

Options	LIC MF Conservative Hybrid Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	81.1461	79.5057
Regular Plan - Monthly IDCW Option	12.4931	12.9362
Regular Plan - Quarterly IDCW Option	14.2538	13.9656
Regular Plan - Annual IDCW Option	11.4702	11.9358
Direct Plan - Growth Option	90.5879	87.9226
Direct Plan - Monthly IDCW Option	12.9168	13.2865
Direct Plan - Quarterly IDCW Option	18.0581	17.6054
Direct Plan - Annual IDCW Option	13.8265	14.1742

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 **Contingent liabilities**

As on 31 March 2026: Nil

As on 31 March 2025: Nil

27 **Unclaimed IDCW and unclaimed redemption**

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653

Distributable surplus	**3,430.89**	**3,582.24**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Conservative Hybrid Fund							
	As at March 31, 2026				As at March 31, 2025

Others	2.29	2.29	3.47	3.47
Total	**28.76**	**28.76**	**36.79**	**36.79**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Conservative Hybrid Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	740.87	988.33
Debentures/ bonds	667.22	412.36
Central government securities	1,709.66	2,210.79
State government securities	653.13	1,182.02
Certificate of deposits	390.02	-
Corporate debt market development fund	18.38	17.35

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Conservative Hybrid Fund	124.05	147.31	(124.05)	(147.31)

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

(b) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Conservative Hybrid Fund	68.76	91.14	(68.76)	(91.14)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Conservative Hybrid Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026

Total interest bearing assets	**153.54**	**-**	**-**	**1,611.77**	**2,109.58**	**3,874.89**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) Credit quality analysis

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Investments in debt and money market securities

As at March 31, 2026, the Scheme was invested in corporate debt and money market securities with the following credit quality. The ratings are provided by credit rating agencies.

Credit ratings	LIC MF Conservative Hybrid Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amount	% of net assets	Amount	% of net assets
AAA	667.22	14.64%	412.36	8.21%
A1+	390.02	8.56%	-	-
Sovereign	2,362.79	51.83%	3,392.81	67.53%

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures were concentrated in the following industries.

Particulars	LIC MF Conservative Hybrid Fund	
	As at March 31, 2026	As at March 31, 2025
Banks	8.56%	-
Finance	5.73%	-
Government Of India	51.83%	67.53%
Power	8.91%	8.21%
	75.03%	**75.74%**

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Conservative Hybrid Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	0.40	-	-	-	0.40
Other financial liabilities	28.36	-	-	-	28.36
	28.76	**-**	**-**	**-**	**28.76**

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Particulars	LIC MF Conservative Hybrid Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	1.19	-	-	-	1.19
Other financial liabilities	35.60	-	-	-	35.60
	36.79	**-**	**-**	**-**	**36.79**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Equity Savings Fund	LIC MF Equity Savings Fund	An open ended scheme investing in equity, arbitrage and debt	The investment objective of the Scheme is to generate regular income by investing in Debt and money market instruments and using arbitrage and other derivative strategies. The Scheme also intends to generate long capital appreciation through unhedged exposure to equity and equity related instruments. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - March 07, 2011 Direct Plan - January 01, 2013	Regular Plan - Growth Option Regular Plan - Monthly IDCW Option Regular Plan - Quarterly IDCW Option Direct Plan - Growth Option Direct Plan - Monthly IDCW Option Direct Plan - Quarterly IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements

LIC MUTUAL FUND
For the year ended March 31, 2026

and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

Loss on derivatives transactions (Gross)	357.56	190.91
Total	**441.60**	**241.56**

Note 22 : Expenses - Others

Particulars	LIC MF Equity Savings Fund	
	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Custodian fees and expenses	0.17	0.18
Registrar fees and expenses	3.75	3.51
Marketing/ publicity/ advertisement expenses	0.35	0.22
Audit fees	0.21	0.24
Investor communication expenses	0.02	-
Investor education and awareness expenses	0.58	0.38
Brokerage & transaction costs	12.27	9.39
Professional fee	0.30	0.17
Transaction processing fees	0.25	0.24
Other operating expense	1.39	0.65
Total	**19.29**	**14.98**

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Equity Savings Fund	0.89%	0.73%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Equity Savings Fund	20.63	0.72%	141.45	7.49%

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Equity Savings Fund	70.65	2.45%	47.87	2.53%

25 **Net asset value per unit** *(all amounts in rupees)*

Options	LIC MF Equity Savings Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	26.6551	26.1343
Regular Plan - Monthly IDCW Option	21.0006	20.5902
Regular Plan - Quarterly IDCW Option	19.8550	19.4671
Direct Plan - Growth Option	30.3132	29.4015
Direct Plan - Monthly IDCW Option	20.4744	19.8600
Direct Plan - Quarterly IDCW Option	16.8864	16.3797

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 **Contingent liabilities**

As on 31 March 2026: Nil

As on 31 March 2025: Nil

27 **Unclaimed IDCW and unclaimed redemption**

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214
Unclaimed Redemptions of Old Redeemed Schemes	5,071.00	46,248	NA	NA

28 **Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)**

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances forLIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

vii) Investment in securities of Sponsor and group companies

Scheme	Issuer	Nature of instrument	For the year ended March 31, 2026		For the year ended March 31, 2025	
			Investment	Aggregate investment by all schemes	Investment	Aggregate investment by all schemes
LIC MF Equity Savings Fund	Larsen & Toubro Ltd.	Equity shares	-	-	26.13	4,835.89

30 Segment reporting

The Scheme operates only in one segment i.e. to primarily generate returns, based on Schemes' investment objectives and there is no separate reportable segment.

31 Details of large holdings i.e. in excess of 25% of the net assets of the Scheme

Scheme	Investor count as at March 31, 2026	Percentage of holding as at March 31, 2026	Investor count as at March 31, 2025	Percentage of holding as at March 31, 2025
LIC MF Equity Savings Fund	1	29.82	-	-

32 Distributable surplus

Particulars	LIC MF Equity Savings Fund	
	As at March 31, 2026	As at March 31, 2025
Total reserves	2,042.16	1,160.44
Less : Unrealised appreciation on investments as at balance sheet date, at portfolio level	2.67	87.33
Less : Credit balance in unit premium reserve at plan level	2,030.06	1,757.47
Distributable surplus	**9.43**	**(684.36)**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Equity Savings Fund							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	2,210.92	-	-	2,210.92	1,487.38	-	-	1,487.38
Units of domestic mutual fund	-	364.09	-	364.09	-	244.90	-	244.90

LIC MUTUAL FUND
Notes to Financial Statements as at March 31, 2026
(All amount in lakhs, unless otherwise stated)

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Equity Savings Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	602.13	602.13	150.49	150.49
Bank balance other than cash and cash equivalents*	19.42	19.42	4.46	4.46
Other financial assets*				
Dividend receivable	-	-	0.23	0.23
Others	18.05	18.05	5.05	5.05
Total	**639.60**	**639.60**	**160.23**	**160.23**
Financial liabilities:				
Payables				
Redemption payable	0.43	0.43	-	-
Contract for purchase of investments	0.51	0.51	12.84	12.84
Other payables	5.59	5.59	1.63	1.63
Other financial liabilities**				
Management fee payable	4.95	4.95	-	-
Commission to distributors payable	2.32	2.32	2.69	2.69
Others	1.32	1.32	1.74	1.74
Total	**15.12**	**15.12**	**18.90**	**18.90**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Equity Savings Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	2,210.92	1,487.38
Units of domestic mutual fund	364.09	244.90
Gold	-	-
Exchange traded fund (ETF)	-	-

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Equity Savings Fund	70.45	52.82	(70.45)	(52.82)

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Equity Savings Fund	0.02	0.01	(0.02)	(0.01)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Equity Savings Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets						
Cash and cash equivalents	602.13	-	-	-	-	602.13
Total interest bearing assets	**602.13**	**-**	**-**	**-**	**-**	**602.13**
As at March 31, 2025						
Fixed rate assets						
Cash and cash equivalents	150.49	-	-	-	-	150.49
Total interest bearing assets	**150.49**	**-**	**-**	**-**	**-**	**150.49**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Derivatives

The table below shows an analysis of derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Arbitrage Fund			
	Derivative assets		Derivative liabilities	
	Fair value	Notional amount	Fair value	Notional amount
As at March 31, 2026				
Exchange-traded	(1,166.38)	(1,187.65)	(1,166.38)	(1,187.65)
Total	**(1,166.38)**	**(1,187.65)**	**(1,166.38)**	**(1,187.65)**
As at March 31, 2025				
Exchange-traded	(675.40)	(682.54)	(675.40)	(682.54)
Total	**(675.40)**	**(682.54)**	**(675.40)**	**(682.54)**

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Equity Savings Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	6.53	-	-	-	6.53
Other financial liabilities	8.59	-	-	-	8.59

As at March 31, 2025					
Non-derivative financial liabilities					
Payables	14.47	-	-	-	14.47
Other financial liabilities	4.43	-	-	-	4.43
Derivative financial liabilities					
Outflows	5.00	-	-	-	5.00
	23.90	**-**	**-**	**-**	**23.90**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

43 Supplementary investment portfolio information and industrywise classification (refer **Annexure VI**)

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Balanced Advantage Fund	LIC MF Balanced Advantage Fund	An open ended dynamic asset allocation fund	The investment objective of the scheme is to provide capital appreciation/ income to the investors from a dynamic mix of equity, debt and money market instruments. The Scheme seeks to reduce the volatility by diversifying the assets across equity, debt and money market instruments. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - November 12, 2021 Direct Plan - November 12, 2021	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect

LIC MUTUAL FUND
For the year ended March 31, 2026

the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund’s Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the “Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds” as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund’s financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Balanced Advantage Fund	0.59%	0.51%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Balanced Advantage Fund	(1,106.30)	(1.43%)	9,662.57	11.69%

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Balanced Advantage Fund	1,869.14	2.42%	1,975.12	2.39%

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Balanced Advantage Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	12.5454	13.1363

Scheme	Issuer	Nature of instrument	For the year ended March 31, 2026		For the year ended March 31, 2025	
			Investment	Aggregate investment by all schemes	Investment	Aggregate investment by all schemes
LIC MF Balanced Advantage Fund	ITC Ltd.	Equity shares	-	-	205.74	3,981.67
LIC MF Balanced Advantage Fund	Larsen & Toubro Ltd.	Equity shares	-	-	1,292.26	4,835.89
LIC MF Balanced Advantage Fund	Union Bank of India	Equity shares	194.19	635.50	-	944.37

30 Segment reporting

The Scheme operates only in one segment i.e. to primarily generate returns, based on Schemes' investment objectives and there is no separate reportable segment.

31 Details of large holdings i.e. in excess of 25% of the net assets of the Scheme:

As at March 31, 2026 - Nil, As at March 31, 2025 - Nil

32 Distributable surplus

Particulars	LIC MF Balanced Advantage Fund	
	As at March 31, 2026	As at March 31, 2025
Total reserves	13,710.08	18,452.85
Less : Unrealised appreciation on investments as at balance sheet date, at portfolio level	0.01	3,956.07
Less : Credit balance in unit premium reserve at plan level	-	-
Distributable surplus	**13,710.07**	**14,496.78**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Balanced Advantage Fund							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	46,955.71	-	-	46,955.71	53,945.01	-	-	53,945.01
Debentures/ bonds	-	8,293.61	-	8,293.61	-	5,003.23	-	5,003.23
Central government securities	-	5,038.63	-	5,038.63	-	9,911.73	-	9,911.73

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Balanced Advantage Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	4,304.14	4,304.14	6,449.92	6,449.92
Bank balance other than cash and cash equivalents*	69.00	69.00	58.30	58.30
Other financial assets*				
Interest accrued	340.33	340.33	282.98	282.98

Other payables	29.59	29.59	18.92	18.92
Borrowings	-	-	-	-
Other financial liabilities**				
Management fee payable	21.55	21.55	34.77	34.77
Commission to distributors payable	126.69	126.69	134.58	134.58
Others	13.93	13.93	33.84	33.84
Total	**348.53**	**348.53**	**282.87**	**282.87**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) *Price risks*

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Balanced Advantage Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	46,955.71	53,945.01
Debentures/ bonds	8,293.61	5,003.23
Central government securities	5,038.63	9,911.73

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Balanced Advantage Fund	2,221.73	3,122.00	(2,221.73)	(3,122.00)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Balanced Advantage Fund	358.26	525.96	(358.26)	(525.96)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Balanced Advantage Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets

As at March 31, 2025						
Fixed rate assets						
Debt instruments	-	-	-	-	14,648.57	14,648.57
Cash and cash equivalents	6,449.92	-	-	-	-	6,449.92
Total interest bearing assets	**6,449.92**	**-**	**-**	**-**	**14,648.57**	**21,098.49**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

As at March 31, 2026, the Scheme was invested in corporate debt and money market securities with the following credit quality. The ratings are provided by credit rating agencies.

Credit ratings	LIC MF Balanced Advantage Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amount	% of net assets	Amount	% of net assets
AAA	5,840.85	8.95%	5,003.23	6.61%
AA+	2,452.77	3.76%	-	-
AA	-	-	-	-
A1+	-	-	-	-
Sovereign	5,038.63	7.72%	9,911.73	13.10%

Derivatives

The table below shows an analysis of derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Balanced Advantage Fund			
	Derivative assets		Derivative liabilities	
	Fair value	Notional amount	Fair value	Notional amount
As at March 31, 2026				
Exchange-traded	(13,623.35)	(14,001.93)	(13,623.35)	(14,001.93)
Total	**(13,623.35)**	**(14,001.93)**	**(13,623.35)**	**(14,001.93)**
As at March 31, 2025				
Exchange-traded	(5,533.13)	(5,574.05)	(5,533.13)	(5,574.05)
Total	**(5,533.13)**	**(5,574.05)**	**(5,533.13)**	**(5,574.05)**

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures were concentrated in the following industries.

Particulars	LIC MF Balanced Advantage Fund	
	As at March 31, 2026	As at March 31, 2025
Banks	-	-
Capital Markets	-	-
Finance	5.26%	-
Government Of India	7.72%	13.10%
Industrial Products	-	-
Power	7.44%	6.61%
Realty	-	-
	20.42%	**19.71%**

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	**LIC MF Balanced Advantage Fund**				
	0-3 months	**3-6 months**	**6 months - 12 months**	**After 12 months**	**Total**
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	186.36	-	-	-	186.36
Other financial liabilities	162.17	-	-	-	162.17
Derivative financial liabilities					
Outflows	11.00	-	-	-	11.00
	359.53	**-**	**-**	**-**	**359.53**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	79.68	-	-	-	79.68
Other financial liabilities	203.19	-	-	-	203.19
Derivative financial liabilities					
Outflows	2.00	-	-	-	2.00
	284.87	**-**	**-**	**-**	**284.87**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	**LIC MF Balanced Advantage Fund**		
	Within 12 months	**After 12 months**	**Total**

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

Regular Plan - February 14, 2025 Direct Plan - February 14, 2025	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial

LIC MUTUAL FUND
For the year ended March 31, 2026

Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

LIC MUTUAL FUND
For the year ended March 31, 2026

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from

LIC MUTUAL FUND
For the year ended March 31, 2026

valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

LIC MUTUAL FUND
For the year ended March 31, 2026

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Multi Asset Allocation Fund	0.43%	0.52%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme’s average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Multi Asset Allocation Fund	(4,112.14)	(5.53%)	282.88	4.82%

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Multi Asset Allocation Fund	1,730.67	2.33%	203.29	3.46%

25 **Net asset value per unit** *(all amounts in rupees)*

Options	LIC MF Multi Asset Allocation Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	10.9359	10.4732
Regular Plan - IDCW Option	10.9359	10.4732
Direct Plan - Growth Option	11.1330	10.4964
Direct Plan - IDCW Option	11.1330	10.4964

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 **Contingent liabilities**

As on 31 March 2026: Nil

As on 31 March 2025: Nil

27 **Unclaimed IDCW and unclaimed redemption**

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214
Unclaimed Redemptions of Old Redeemed Schemes	5,071.00	46,248	NA	NA

28 **Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)**

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

Less : Credit balance in unit premium reserve at plan level	3,491.10	41.95
Distributable surplus	**3,982.85**	**70.73**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Multi Asset Allocation Fund							
	As at March 31, 2026				As at March 31, 2025

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Multi Asset Allocation Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	56,904.44	35,443.75
Debentures/ bonds	1,778.19	3,495.87
Central government securities	5,425.90	1,040.84
Certificate of deposits	2,404.77	-
Exchange traded fund (ETF)	16,729.97	7,746.53

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Multi Asset Allocation Fund	3,934.88	2,374.83	(3,934.88)	(2,374.83)

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Multi Asset Allocation Fund	213.28	123.62	(213.28)	(123.62)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Multi Asset Allocation Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

As at March 31, 2026, the Scheme was invested in corporate debt and money market securities with the following credit quality. The ratings are provided by credit rating agencies.

Credit ratings	LIC MF Multi Asset Allocation Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amount	% of net assets	Amount	% of net assets
AAA	1,778.19	2.07%	3,495.87	6.99%
A1+	2,404.77	2.80%	-	-
Sovereign	5,425.90	6.31%	1,040.84	2.08%

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures were concentrated in the following industries.

Particulars	LIC MF Multi Asset Allocation Fund	
	As at March 31, 2026	As at March 31, 2025
Banks	2.80%	-
Construction	0.59%	-
Finance	0.88%	4.04%
Government Of India	6.31%	2.08%
Power	0.60%	2.95%
	11.18%	**9.07%**

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Multi Asset Allocation Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	198.49	-	-	-	198.49
Other financial liabilities	228.56	-	-	-	228.56
	427.05	**-**	**-**	**-**	**427.05**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	1,000.85	-	-	-	1,000.85
Other financial liabilities	240.25	-	-	-	240.25
	1,241.10	**-**	**-**	**-**	**1,241.10**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Total (B)	**1244.56**	**-**	**1244.56**

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

43 Supplementary investment portfolio information and industrywise classification (refer **Annexure VI**)

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Unit Linked Insurance Scheme (ULIS)	LIC MF Unit Linked Insurance Scheme	An open ended insurance linked tax saving scheme (Refer Note 41 on Signing page)	An open ended scheme which seeks to generate long term capital appreciation and offer Tax benefits u/s 80C of the Income Tax Act as well as additional benefit of a life cover. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - June 19, 1989 Direct Plan - March 01, 2013	Regular Plan - IDCW Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied. For ULIS also refer Note 41.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period , as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

LIC MUTUAL FUND
For the year ended March 31, 2026

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. **Fair value measurement**

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as "below investment grade" if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as "default" if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to "default" grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from

LIC MUTUAL FUND
For the year ended March 31, 2026

valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

LIC MUTUAL FUND
For the year ended March 31, 2026

For receivables, the Fund applies ‘simplified approach’ which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme’s daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day’s closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Unit Linked Insurance Scheme (ULIS)	0.76%	0.76%

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Unit Linked Insurance Scheme (ULIS)	(1,547.34)	(3.32%)	5,242.32	10.57%

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Scheme	Expenditure			
	From April 01, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets

(All amount in lakhs, unless otherwise stated)

30 Segment reporting

The Scheme operates only in one segment i.e. to primarily generate returns, based on Schemes' investment objectives and there is no separate reportable segment.

31 Details of large holdings i.e. in excess of 25% of the net assets of the Scheme:

As at March 31, 2026 - Nil, As at March 31, 2025 - Nil

32 Distributable surplus

Particulars	LIC MF Unit Linked Insurance Scheme (ULIS)	
	As at March 31, 2026	As at March 31, 2025
Total reserves	27,693.06	33,519.92
Less : Unrealised appreciation on investments as at balance sheet date, at portfolio level	12,984.68	17,099.75
Less : Credit balance in unit premium reserve at plan level	-	-
Distributable surplus	**14,708.38**	**16,420.17**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Unit Linked Insurance Scheme (ULIS)							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total

Total	**634.41**	**634.41**	**2,623.42**	**2,623.42**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Unit Linked Insurance Scheme (ULIS)	
	As at March 31, 2026	As at March 31, 2025
Equity shares	29,983.89	34,501.05
Debentures/ bonds	2,076.55	4,145.41
Central government securities	4,472.43	3,661.04
State government securities	1,845.76	2,437.16
Certificate of deposits	487.53	-

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Unit Linked Insurance Scheme (ULIS)	1,837.11	2,147.87	(1,837.11)	(2,147.87)

(b) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	**Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%**		**Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%**	
	As at March 31, 2026	**As at March 31, 2025**	**As at March 31, 2026**	**As at March 31, 2025**
LIC MF Unit Linked Insurance Scheme (ULIS)	284.04	317.83	(284.04)	(317.83)

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	**LIC MF Unit Linked Insurance Scheme (ULIS)**					
	0-3 months	**3-6 months**	**6 months-1 year**	**1-5 years**	**More than 5 years**	**Total**
As at March 31, 2026

Total interest bearing assets	**895.61**	**487.24**	**-**	**952.51**	**7,620.64**	**9,956.00**
As at March 31, 2025						
Fixed rate assets						
Debt instruments	-	-	-	1,611.17	8,469.51	10,080.68
Cash and cash equivalents	3,568.99	-	-	-	-	3,568.99
Total interest bearing assets	**3,568.99**	**-**	**-**	**1,611.17**	**8,469.51**	**13,649.67**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026 and March 31, 2025.

Investments in debt and money market securities

As at March 31, 2026, the Scheme was invested in corporate debt and money market securities with the following credit quality. The ratings are provided by credit rating agencies.

Credit ratings	**LIC MF Unit Linked Insurance Scheme (ULIS)**			
	As at March 31, 2026		**As at March 31, 2025**	
	Amount	**% of net assets**	**Amount**	**% of net assets**
AAA	2,076.55	5.20%	4,145.41	8.82%
A1+	487.53	1.22%	-	-
Sovereign	6,318.19	15.81%	6,098.21	12.97%

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026 and March 31, 2025.

b) Concentration of credit risk

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures were concentrated in the following industries.

Particulars	LIC MF Unit Linked Insurance Scheme (ULIS)	
	As at March 31, 2026	As at March 31, 2025
Banks	2.48%	-
Finance	1.25%	6.47%
Government Of India	15.81%	12.97%
Power	2.68%	2.35%
	22.22%	**21.79%**

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) Collateral and other credit enhancements, and their financial effect

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) Expected credit loss principles

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Unit Linked Insurance Scheme (ULIS)				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	25.27	-	-	-	25.27
Other financial liabilities	609.14	-	-	-	609.14
	634.41	**-**	**-**	**-**	**634.41**
As at March 31, 2025					
Non-derivative financial liabilities					
Payables	2,019.93	-	-	-	2,019.93
Other financial liabilities	603.49	-	-	-	603.49
	2,623.42	**-**	**-**	**-**	**2,623.42**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	LIC MF Unit Linked Insurance Scheme (ULIS)

Total (B)	**2,626.82**	**-**	**2,626.82**

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund’s series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

41 **LIC Mutual Fund Unit Linked Insurance Scheme ("LICMF ULIS")** is a scheme launched by LIC Mutual Fund in 1989 with a 80C benefit under the Income Tax Act, 1961. The scheme was launched prior to SEBI (Mutual Fund) Regulations came into effect. The subject Scheme along with Mutual fund features, offers additional Life Insurance Cover, Personal Accident Cover & Maturity/ Loyalty Bonus to the investors. SEBI had issued circular on Categorisation and Rationalisation of Mutual Fund Schemes in 2017 and this Scheme was subject to comply with the requirements of the said circular. SEBI vide their letter Ref: SEBI/HO/OW/IMD-II/DOF3/2022/26168/1 dated June 27, 2022, communicated to LIC Mutual Fund Asset Management Ltd ("LICMF AMC") by citing reference of circulars issued on categorization of mutual fund schemes and Securities and Insurance Laws (Amendment and Validation) Act, 2010 enacted in Parliament on April 9, 2010 & Amendment in SEBI Act 1992, Section 12, Sub Section (IB), advised to approach appropriate authority for further guidance and stop subscription in aforesaid scheme till the matter is concluded. Accordingly, in compliance with the said communication, LICMF AMC has placed the matter before the Board(s) of LICMF Mutual Fund Asset Management Ltd & LIC Mutual Fund Trustee Pvt. Ltd. in their Board Meetings respectively and subsequently issued a public notice cum addendum dated June 30, 2022 informing the investors/unitholders about the suspension of subscription from new investors in the subject scheme, effective July 01, 2022. This Scheme was considered as a Scheme under SEBI (Mutual Funds) Regulations and all the required disclosures/regulatory reporting are being carried out accordingly. The management is in discussion with relevant authorities and as of now does not believe that there will be any concerns on continuation of this as a mutual fund scheme and nor it would have any impact on the operations of the Scheme.

42 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

43 The figures for the previous period have been regrouped/ reclassified wherever necessary to conform with the current year's presentation and classification.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Consumption Fund	LIC MF Consumption Fund	An open ended equity scheme following a consumption theme	The investment objective of the Scheme is to achieve long term capital appreciation by predominantly investing in equity and equity related instruments of companies following consumption theme. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - November 21, 2025 Direct Plan - November 21, 2025	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period, as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

LIC MUTUAL FUND
For the year ended March 31, 2026

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

LIC MUTUAL FUND
For the year ended March 31, 2026

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from

LIC MUTUAL FUND
For the year ended March 31, 2026

valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day's prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

LIC MUTUAL FUND
For the year ended March 31, 2026

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme's daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day's closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From November 21, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Consumption Fund	0.53%	NA

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme's average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From November 21, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Consumption Fund	(7,290.39)	(40.57%)	NA	NA

Scheme	Expenditure			
	From November 21, 2025 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Consumption Fund	493.53	2.75%	NA	NA

25 Net asset value per unit *(all amounts in rupees)*

Options	LIC MF Consumption Fund	
	As at March 31, 2026	As at March 31, 2025

As on 31 March 2026: Nil

As on 31 March 2025: Nil

27 Unclaimed IDCW and unclaimed redemption

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214
Unclaimed Redemptions of Old Redeemed Schemes	5,071.00	46,248	NA	NA

28 Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

Distributable surplus	**(7,685.82)**	**NA**

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Consumption Fund							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	40,056.66	-	-	40,056.66	NA	NA	NA	NA

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Consumption Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	3,549.07	3,549.07	NA	NA
Bank balance other than cash and cash equivalents*	11.96	11.96	NA	NA
Other financial assets*

Commission to distributors payable	51.55	51.55	NA	NA
Others	13.39	13.39	NA	NA
Total	**127.74**	**127.74**	**NA**	**NA**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Consumption Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	40,056.66	NA

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Consumption Fund	2,002.93	NA	(2,002.93)	NA

(b) *Foreign exchange risk*

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) *Interest rate risk*

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Consumption Fund	0.10	NA	(0.10)	NA

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Consumption Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets						
Cash and cash equivalents	3,549.07	-	-	-	-	3,549.07
Total interest bearing assets	**3,549.07**	**-**	**-**	**-**	**-**	**3,549.07**

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	**LIC MF Consumption Fund**				
	0-3 months	**3-6 months**	**6 months - 12 months**	**After 12 months**	**Total**
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	30.50	-	-	-	30.50
Other financial liabilities	97.24	-	-	-	97.24
	127.74	**-**	**-**	**-**	**127.74**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

38 Maturity analysis of assets and liabilities

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

LIC MUTUAL FUND
For the year ended March 31, 2026

1 General information

LIC Mutual Fund (the "Mutual Fund") has been constituted as a trust on April 20, 1989 in accordance with the provisions of the Indian Trusts Act, 1882 (2 of 1882) with LIC of India as the Sponsor and the LIC Mutual Fund Trustee Private Limited as the Trustee. The trust deed has been registered under the Indian Registration Act, 1908. The Mutual Fund was registered with SEBI on May 9, 1994 vide registration code no. MF/012/94/5. LIC Mutual Fund is sponsored by LIC of India. The Sponsor is the Settler of the Mutual Fund.

The objective and other feature of the Schemes covered in the Financial Statements are as under:

Scheme name	Scheme name (short name)	Type of scheme	Investment objective of the scheme	Allotment date/ Launched date	Options
LIC MF Technology Fund	LIC MF Technology Fund	An open ended equity scheme investing in the stocks of technology and technology-related companies	The investment objective of the Scheme is to achieve long term capital appreciation by predominantly investing in equity and equity related instruments of technology & technology-related companies. There is no assurance that the investment objective of the Scheme will be achieved.	Regular Plan - March 13, 2026 Direct Plan - March 13, 2026	Regular Plan - Growth Option Regular Plan - IDCW Option Direct Plan - Growth Option Direct Plan - IDCW Option

2 Basis of preparation and presentation

2.1 Statement of compliance

The Financial Statements of the Fund have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 including guidelines issued thereunder, as amended from time to time ("the SEBI MF Regulations"). In case of any conflict between the requirements of Ind AS and SEBI MF Regulations, the requirements specified under SEBI MF Regulations are applied.

2.2 (a) Presentation of Financial Statements

These Financial Statements of the Fund are presented in the format prescribed in paragraph 17.14 of SEBI Master Circular for Mutual Funds. The disclosures as required under Ind AS, as applicable to the Fund, are included in these Financial Statements.

The Fund has prepared the Financial Statements on the basis that it will continue to operate as a going concern.

Financial assets and financial liabilities are generally reported gross in the balance sheet. They are only offset and reported net when, in addition to having an unconditional legally enforceable right to offset the recognised amounts without being contingent on a future event, the parties also intend to settle on a net basis in all of the following circumstances:

- The normal course of business
- The event of default
- The event of insolvency or bankruptcy of the Fund and/ or its counterparties

The Fund presents its Balance Sheet in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in Note 38.

(b) Provisions and contingent liabilities

The Scheme estimates the provision that have present obligation as a result of past events, and it is probable that outflow of resources will be required to settle the obligations. These provisions are reviewed at the end of each reporting period and are adjusted to reflect the current best estimates. The Scheme uses significant judgement to disclose contingent liabilities. Contingent liabilities are disclosed when there is a possible obligation arising from past events. The existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Scheme or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made. Contingent assets are neither recognized nor disclosed in the Financial Statements.

2.3 Functional and presentational currency

Item included in the Financial Statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates ("the functional currency"). The Financial Statements are presented in Indian rupee (INR), which is Fund's functional and presentation currency, and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

2.4 Basis of measurement

The Financial Statements have been prepared under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values through profit and loss at the end of each reporting period, as explained below.

All assets and liabilities for which fair value is measured or disclosed in the Financial Statements are categorized within the fair value hierarchy, described as follows, based on the degree to which the inputs to the fair value measurements are observable and the significance of the fair value measurement in its entirety:

- Level 1 - Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs are other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 - Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor are they based on available market data.

2.5 Significant accounting judgments, estimates and assumptions

The preparation of Financial Statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities and accompanying disclosures (including contingent liabilities) at the date of the Financial Statements and the reported amounts of revenues and expenses for the reporting period. The estimates and assumptions used in the accompanying Financial Statements are based upon management's evaluation of the relevant facts and circumstances as of the date of Financial Statements. Actual results

LIC MUTUAL FUND
For the year ended March 31, 2026

could differ from these estimates. Any revisions to accounting estimates are recognized prospectively in the current and future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Key sources of estimation of uncertainty at the date of Financial Statements, which may cause a material adjustment to the carrying amount of assets and liabilities within the next financial year are included in the following notes:

a. Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using various valuation techniques. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. See note 35 for more information on the fair value measurement of the Fund's Financial Statements.

3 Summary of material accounting policies

3.1 Income recognition

Interest is recognised on a time-proportionate basis using the effective interest method. Interest on CCIL is accounted on cash receipt basis.

Dividend income is recognized on ex-dividend date for quoted shares and for unquoted shares dividend income is recognized on the date of declaration.

Profit or loss on sale/ redemption of investments is determined on the basis of the weighted average cost method. Transactions for purchase or sale of investments are recognised as of the trade date.

Income on derivative (MTM gain/ loss) is recognised as difference between the current day settlement or closing price (-) previous day settlement or closing price (If scrip is purchased first time then it is a current day settlement or closing price (-) weighted average price).

Income recognition for securities rated below investment grade assets or default is in accordance with the "Guidelines for Identification and Provisioning for securities rated below investment grade assets or default (Debt Securities) for Mutual Funds" as issued by SEBI.

Bonus entitlements are recognised as investments on the ex-bonus date.

In respect of purchase/ sale of interest bearing investments, accrued interest (broken period interest) receivable/ payable is debited/ credited to interest recoverable account and not added to or deducted from the cost of investment.

3.2 Financial instruments

Initial recognition and measurement of financial assets and financial liabilities

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

All financial assets and financial liabiliites are recognised initially at fair value when the parties become party to the contractual provisions of the financial asset. In case of financial assets which are not recorded at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets, are adjusted to the fair value on initial recognition.

The Fund's financial assets includes investments, derivative contracts, receivables, cash and cash equivalents, bank balances other than cash and cash equivalents and other financial assets.

Purchase and sale of investments are recorded on the date of the transaction, at cost and sale price respectively, after excluding brokerage, commission, CCIL charges, Stamp duty and fees payable or receivable.

Classification and subsequent measurement of financial assets and financial liabilities

Evaluation of business model - Classification and measurement of financial assets depends on the results of business model and the solely payments of principal and interest ("SPPI") test.

As per Eighth Schedule, the valuation of investments shall be based on the principles of fair valuation i.e. valuation shall be reflective of the realizable value of the securities. The valuation shall be done in good faith and in true and fair manner through appropriate valuation policies and procedures.

The Fund's portfolio of financial assets is managed, and its performance is evaluated on a fair value basis in accordance with the Fund's documented investment strategy, together with other related financial information.

The Fund is required to fair value investment as per SEBI Regulations. Hence, the Fund has not performed the SPPI Test.

Investments at fair value through profit or loss (FVTPL)

All investments are measured at FVTPL. Investments at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognized in the Revenue Account. The gain recognized in the Revenue Account is included in the 'Gain on fair value change' line item and in case of loss recognized in the Revenue Account is included in the 'Loss on fair value change' line item.

Financial liabilities

Derivative contracts that have a negative fair value are presented as liabilities at FVTPL.

Interest expense and foreign exchange gains and losses are recognised in the Revenue Account.

Financial instruments not measured at fair value

The carrying value less expected credit loss provision of other financial assets and other financial liabilities are assumed to approximate their fair values due to their short-term nature.

Derecognition

The Fund derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Fund enters into transactions whereby it transfers assets recognised on its Balance Sheet but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

The Scheme derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

3.3 Valuation of investments

Valuation of equity and equity related securities

Traded securities

On a valuation day, traded securities are to be valued at the closing price on the primary stock exchange (NSE).

LIC MUTUAL FUND
For the year ended March 31, 2026

When on a valuation day, a security has not been traded on the primary stock exchange (NSE); the closing price on secondary stock exchange (BSE) will be used.

When a security is not traded on any stock exchange on a particular valuation day, the closing price on the primary stock exchange or any other stock exchange, as the case may be on the earliest previous day may be used provided the date is not more than 30 days prior to valuation date.

For valuation of securities held by exchange traded funds (ETFs) and index funds which are benchmarked to indices relating to a particular stock exchange, the primary stock exchange to be considered for valuation of securities will be that particular stock exchange i.e., securities held in ETFs and index funds are to be valued at closing price on the stock exchange of the underlying index. E.g., for an Index Fund - Sensex or Sensex ETF, the primary stock exchange will be BSE Ltd.

Non traded securities

When an equity security or preference share is not traded on any stock exchange on a particular valuation day, the value at which it was traded on NSE or BSE or any other stock exchange (in that order) on the earliest previous day is used, provided that such day is not more than thirty days prior to the valuation date.

Thinly traded securities

Thinly traded/ privately placed equity securities including those not traded within thirty days are valued at fair value as per procedures determined by AMC and approved by the Trustee in accordance with the guidelines for valuation of securities for mutual funds, issued by the Securities and Exchange Board of India (SEBI) from time to time.

Valuation of equity warrants

In respect of warrants to subscribe for shares attached to instruments, the warrants can be valued at the value of the share which would be obtained on exercise of the warrant as reduced by the amount which would be payable on exercise of the warrant. The value of the latter instrument can be adopted after an appropriate discount of the non-tradability of the instrument during the period preceding the conversion while valuing such instruments. If the warrants exercise price exceeds the underlying equity price, warrants would be valued at zero.

Valuation of rights entitlement

Till listing right entitlements are valued at the difference between price of the underlying share and the rights offer price.

Once rights commence trading on the exchanges, if it is intended that rights will be subscribed for, the aforementioned approach will prevail i.e. traded price of rights will not be taken into consideration.

Where it is decided not to subscribe for the rights but to renounce them and renunciations are being traded, the rights can be valued at the renunciation value.

Valuation of partly paid-up equity shares

In case the partly paid-up equity shares are traded separately, they would be valued as per the valuation guidelines applicable to any other listed equity shares.

In case the partly paid-up equity shares are not traded, then the partly paid-up equity shares will be valued at lower of the following two prices:

a. Value of the underlying fully paid-up equity shares as reduced by the amount of balance call money payable.

b. The value at which it was traded on the earliest previous day may be used, provided such date is not more than 30 days prior to valuation date.

In case the trade price of the partly paid-up equity shares were not available for last 30 days or in case of unlisted partly paid-up equity shares, it will be valued at the value of the underlying fully paid-up equity share as reduced by the amount of balance call money payable.

Investments in fixed income securities (other than government securities) are valued as follows:

All debt securities and money market securities irrespective of their residual maturity, are valued at the average of the prices provided by Crisil and ICRA. Any new debt security not forming part of the SLV database is valued at the purchase yield on the date of purchase and till the time it gets included in the SLV (Scrip Level Valuation) universe.

Investments in government securities and treasury bills are valued as follows:

Government Securities (including T-bills) shall be valued based on security level prices obtained from valuation agencies.

Valuation of money market and debt securities which are rated below investment grade

A money market or debt security shall be classified as “below investment grade” if the long term rating of the security issued by a SEBI registered Credit Rating Agency (CRA) is below BBB- or if the short term rating of the security is below A3.

A money market or debt security shall be classified as “default” if the interest and/ or principal amount has not been received, on the day such amount was due or when such security has been downgraded to “default” grade by a CRA.

All money market and debt securities which are rated below investment grade shall be valued at the price provided by valuation agencies. In case valuation is not available from valuation agencies then valuation will be on the basis of indicative haircuts provided by these agencies.

Treatment of accrued interest, future interest accrual and future recovery

The indicative haircut that has been applied to the principal should be applied to any accrued interest.

In case of securities classified as below investment grade but not default, interest accrual may continue with the same haircut applied to the principal. In case of securities classified as default, no further interest accrual shall be made.

Any recovery shall first be adjusted against the outstanding interest recognized in the NAV and any balance shall be adjusted against the value of principal recognized in the NAV.

Any recovery in excess of the carried value (i.e. the value recognized in NAV) should then be applied first towards amount of interest written off and then towards amount of principal written off.

Treatment of upfront fees on trades

Upfront fees on all trades (including primary market trades), by whatever name and manner called, would be considered by the valuation agencies for the purpose of valuation of security.

Details of such upfront fees will be shared to the valuation agencies on the trade date as part of the trade reporting to enable them to arrive at the fair valuation for that date.

For the purpose of accounting, such upfront fees will be reduced from the cost of the investment in the scheme that made the investment. In case upfront fees are received across multiple schemes, such upfront fees will be shared on a pro-rata basis across such schemes.

LIC MUTUAL FUND
For the year ended March 31, 2026

Valuation of tri-party repo (TREPS) and repurchase (repos) (including corporate bond repo)

Investment in TREPS or repurchase (repos) except for overnight transactions shall be valued at average of security level prices obtained from valuation agencies appointed by AMFI. In case security level prices given by valuation agencies are not available for a new TREPS or REPOS (which is currently not held by any Mutual Fund), then such may be valued at purchase yield on the date of purchase.

For overnight investments in TREPS or repurchase (repos) shall be valued at the purchase yield/price on the date of allotment/ purchase.

Note: All securities taken under Repurchase (Repos) will not be considered for valuation. Only the interest on Repurchase (Repos) would be considered for NAV calculation.

Mutual fund units

Units listed and traded would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered. Unlisted units, to be listed units, or units listed but non-traded, would be valued at the Net Asset Value (NAV) as on the valuation date.

Exchange traded (ETF) units ETF

Units would be valued at the closing traded price on the National Stock Exchange (NSE)/ Bombay Stock Exchange (BSE) on the valuation day. If not traded on the primary stock exchange (NSE), the closing price on the other stock exchange will be considered.

Corporate Debt Market Development Fund (CDMDF)

Units of Corporate Debt Market Development fund will be valued at the NAV per unit released on AMFI daily basis.

Gold

The gold held by a gold exchange traded fund scheme is valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for gold having a fineness of 995.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); &

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such gold from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the gold from the London to the place where it is actually stored on behalf of the mutual fund;

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of gold to the place where it is stored on behalf of the mutual fund;

   Provided that where the gold held by a gold exchange traded fund scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this subparagraph.

If the gold acquired by the gold exchange traded fund scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day’s prices are applied for the purpose of calculating the value of gold.

GST will not be included for valuation of Gold as the Scheme will be eligible for input credit of GST paid on purchase of Gold.

Silver

The silver held by a scheme shall be valued at the AM fixing price of London Bullion Market Association (LBMA) in US dollars per troy ounce for silver having a fineness of 999.0 parts per thousand, subject to the following:

a. Adjustment for conversion to metric measure as per standard conversion rates;

b. Adjustment for conversion of US dollars into Indian rupees as per the RBI reference rate declared by the Foreign Exchange Dealers Association of India (FEDAI); and

c. Addition of

   (i) transportation and other charges that may be normally incurred in bringing such silver from London to the place where it is actually stored on behalf of the mutual fund; and

   (ii) notional customs duty and other applicable taxes and levies that may be normally incurred to bring the silver from London to the place where it is actually stored on behalf of the mutual fund:

   Provided that the adjustment under clause (c) above may be made on the basis of a notional premium that is usually charged for delivery of silver to the place where it is stored on behalf of the mutual fund;

   Provided further that where the silver held by a scheme has a greater fineness, the relevant LBMA prices of AM fixing shall be taken as the reference price under this sub-paragraph.

If the Silver acquired by the scheme is not in the form of standard bars, it shall be assayed and converted into standard bars which comply with the good delivery norms of the LBMA and thereafter valued in terms of methodology mentioned above.

If on any day the LBMA AM fixing or RBI reference rate is not available due to holiday, then the immediately previous day’s prices are applied for the purpose of calculating the value of silver.

GST will not be included for valuation of Silver as the Scheme will be eligible for input credit of GST paid on purchase of Silver.

The net unrealized appreciation/ depreciation in the value of investments is determined at asset type level. The change in net unrealized gain/ loss, between two balance sheet dates is recognized in the revenue account and net unrealized gain, if any, is thereafter appropriated to the unrealized appreciation reserve.

3.4 Impairment of financial assets

In accordance with Ind AS 109, the Fund uses ‘Expected Credit Loss’ (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

LIC MUTUAL FUND
For the year ended March 31, 2026

i) The 12 months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or

ii) Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For receivables, the Fund applies ‘simplified approach’ which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Fund uses historical default rates to determine impairment loss on the portfolio of receivables. At every reporting date, these historical default rates are reviewed and changes in the forward-looking estimates are analysed.

For other assets, the Fund uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

3.5 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Fund or the counterparty.

3.6 Equalisation account

Income equalisation reserve is maintained (for open ended schemes) by crediting (or debiting) the income equalisation reserve account in respect of purchase of units (or redemption of units) by an appropriate amount, which represents the distributable income at the time of purchase (or redemption). The balance in the income equalisation reserve account is transferred to the revenue account at the end of the year.

3.7 Determination of net asset value

The net asset value of the units of the Scheme is determined separately for the units issued under the options.

For reporting the net asset values within the portfolio, the Scheme’s daily income earned, including realised profit or loss and unrealised gain or loss in the value of investments, and expenses accrued, are allocated to the related plans in proportion to their respective daily net assets arrived at by multiplying day end outstanding units to previous day’s closing net asset value.

3.8 Unit capital

Unit capital represents the net outstanding units at the Balance Sheet date, thereby reflecting all transactions relating to the year ended on that date.

Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

3.9 Taxes

No income tax provision has been made as the Fund qualifies as a recognized Mutual Fund under section 10(23D) of the Income-tax Act, 1961.

3.10 Expenses

a. All expenses are accounted for on accrual basis.

b. New fund offer (NFO) expenses: New fund offer expenses for the Schemes were borne by the AMC.

c. Paragraph 10.1.12 of SEBI Master Circular for Mutual Funds, all the Scheme related expenses including commission paid to distributors, by whatever name called and in whatever manner paid, are borne and paid by the Schemes within regulatory limits mandated under regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.

d. Accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) is accrued in accordance with regulation 52(6A). The Schemes have stopped accrual of expenses, in addition to TER, for distribution expenses incurred for bringing in inflows from beyond top 30 cities (as notified by Association of Mutual Funds of India (AMFI)) w.e.f. March 01, 2023.

e. In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets in case of active schemes and 1 basis point in case of passive schemes except Fund of Funds (FoFs) for investor education and awareness initiatives. The said limits were modified in accordance with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 116/ 2024-25 dated March 15, 2025 to 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for Schemes qualifying under MF lite Framework and Nil in case of Fund of Fund schemes) with effect from March 16, 2025.

f. Additional amount towards expenses specified in the said Regulation 52 not exceeding 0.05% of the daily net assets of the Scheme wherever exit load has been charged to the Schemes.

g. GST on investment management and advisory fees is charged over and above the cumulative limits as specified above.

h. The cost of borrowing for meeting redemptions have been charged to Schemes not exceeding the portfolio return of the borrowing Scheme and balance, if any, have been borne by the AMC. With effect from March 23, 2018, as per AMFI best practice guideline circular, cost of borrowing in the Schemes of LIC Mutual Fund has been charged to the Scheme to the extent of yield to maturity (YTM)/ running yield of the Fund as on the previous day and excess, if any, have been borne by the AMC.

3.11 Cash and cash equivalents

Cash and cash equivalents in the Balance Sheet comprise of cash on hand and tri-party repo (including reverse purchase transactions). For the purpose of presentation in the Statement of Cash Flows, cash and cash equivalents includes cash on hand, balances with banks in current accounts, deposits placed with scheduled banks (with an original maturity of upto three months) and tri-party repo (including reverse purchase transactions) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

3.12 Load

Exit load collected in the Schemes net of GST is credited back to the scheme. The GST on exit load is paid out of the exit load proceeds collected.

3.13 Statement of cash flows

Cash flows are reported using the indirect method, whereby net surplus/ (deficit) for the year is adjusted for the effects of transactions of non-cash future, any deferrals or accruals of past or future operating cash receipts or payments and item of expenses associated with investing or financing cash flows. The cash flows from operating and financing activities of the Fund are segregated.

3.14 New standards and interpretations not yet adopted

No new standards or amendments to the existing standards are applicable to the scheme.

23 Management and trusteeship fee

The Schemes pay fee for investment management services (excluding goods & services tax) under an agreement with the AMC, which provides for computation of such fee as a percentage of Scheme's average daily net assets, after excluding the net asset value of the investments by the AMC in the Scheme, the net asset value of the investments made in other Schemes and fixed deposits as applicable. During the year ended, the Schemes have paid management fee at annualised average rate as follows:

Scheme	From March 13, 2026 to March 31, 2026	From April 01, 2024 to March 31, 2025
LIC MF Technology Fund	0.58%	NA

The Schemes pay fee for trusteeship services under an agreement with the Trustee, aggregating Rs.50,00,000/- (excluding GST). This has been allocated in proportion to the monthly average net assets of the respective schemes.

24 Income and expenditure

The total income (includes provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments, excluding net unrealised gain in value of investments) and expenditure (excluding provision for net unrealised loss in value of investments, realised loss on sale of investments, realised loss on inter-scheme transfer/ sale of investments) and these amounts as a percentage of the Scheme’s average daily net assets on an annualised basis are provided below:

Scheme	Income			
	From March 13, 2026 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Technology Fund	(24.84)	(6.29%)	NA	NA

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

Scheme	Expenditure			
	From March 13, 2026 to March 31, 2026		From April 01, 2024 to March 31, 2025	
	Amount	as a percentage of average daily net assets	Amount	as a percentage of average daily net assets
LIC MF Technology Fund	14.87	3.76%	NA	NA

25 **Net asset value per unit** *(all amounts in rupees)*

Options	LIC MF Technology Fund	
	As at March 31, 2026	As at March 31, 2025
Regular Plan - Growth Option	9.9469	NA
Regular Plan - IDCW Option	9.9469	NA
Direct Plan - Growth Option	9.9560	NA
Direct Plan - IDCW Option	9.9560	NA

The net asset value of the Scheme's unit is determined separately for units issued under the options after including the respective unit capital and reserves and surplus.

The net asset value disclosed above represents the computed NAV as on balance sheet date, and not the last declared NAV.

26 **Contingent liabilities**

As on 31 March 2026: Nil

As on 31 March 2025: Nil

27 **Unclaimed IDCW and unclaimed redemption**

The amount of unclaimed IDCW and unclaimed redemptions at fund level and the number of investors to whom the amounts are payable are as follows:

Particulars	As at March 31, 2026		As at March 31, 2025	
	Amount	No of investors	Amount	No of investors
Unclaimed IDCW	674.00	16,440	582.93	16,653
Unclaimed redemptions	1,465.00	14,735	1,445.24	14,214
Unclaimed Redemptions of Old Redeemed Schemes	5,071.00	46,248	NA	NA

28 **Investor Education Fund (IEF) and Investor Education & Awareness Initiative (IEAI)**

In line with paragraph 10.1.16 of the SEBI Master Circular for Mutual Funds, the AMC has set aside 2 basis point on daily net assets as per Regulation 52 of SEBI (Mutual Funds) Regulations, 1996 (1 Basis point in case of Passive Funds till March 15, 2025 and subsequently in line with SEBI Circular No. SEBI/HO/IMD/PoD2/P/CIR/2024/183 dated December 31, 2024 on Introduction of a Mutual Funds Lite (MF Lite) framework for passively managed schemes of Mutual Funds & AMFI Communication No. 35P/ MEM-COR/ 08/ 2025-26 dated April 9, 2025, 5% of total TER charged to direct plans, subject to maximum of 0.5 bps of AUM for schemes qualifying under MF lite Framework, Nil in case of Fund of Fund schemes).

These funds set aside are used only for meeting expenses for Investor Education and Awareness Initiatives. Further, in accordance with AMFI best practice guidelines circular no 135/BP/56/2015-16 dated April 20, 2015, the cumulative balance of the IEAI is transferred on periodic basis to a separate bank account maintained for the purpose.

In line with the SEBI Letter no.IMD/DF2/RS/813/2016 dated January 08, 2016, 50% of the amount set aside for IEAP has been transferred to AMFI on monthly basis within prescribed time lines.

Movement in IEAI balances for LIC Mutual fund during the financial year ended March 31, 2026 and March 31, 2025 is given below:

Particulars	From April 01, 2025 to March 31, 2026	From April 01, 2024 to March 31, 2025
Opening balance	750.70	555.91
Additions during the current year*	10,884.93	940.51
Less: Utilizations during the current year	(462.24)	(432.22)
Less: 50% balance transfer to AMFI	(383.67)	(313.50)
Closing balance	**10,789.72**	**750.70**

*Includes income earned on the Unclaimed amount of Old Redeemed Schemes which is transferred to IEAP

(All amount in lakhs, unless otherwise stated)

33 Derivatives disclosure

Refer **Annexure IV** for details of derivatives exposure and transaction during the year ended March 31, 2026.

34 During the period, borrowings are done to meet temporary liquidity needs for the purpose of redemption of units in accordance with the SEBI (Mutual Funds) Regulations 1996, within the regulatory limit of 20% of the previous day's net assets of the Scheme and repaid these amounts within the regulatory time limit of six months. (refer **Annexure V** for the outstanding borrowing as on year end).

35 Fair value measurement

The Scheme measures its financial assets and financial liabilities at fair value at each reporting date.

All financial assets and financial liabilities for which fair value is measured or disclosed in the Financial Statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

i) Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

ii) Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

iii) Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Assessing the significance of a particular input requires judgement, considering factors specific to the asset or liability.

Valuation techniques and classification

Corporate bonds and commercial papers are valued at average of scrip level prices provided by CRISIL & ICRA Limited for individual securities. If security level price for new security purchased (primary allotment or secondary market) is not available from valuation agencies, the valuation of such securities shall be done at the weighted average yield of all the purchases made by LIC Mutual Fund from the day of allotment/ purchase. The inputs that are significant to valuation are generally observable. Corporate bonds and commercial papers which are listed have been classified as Level 2 and certificate of deposits which are unlisted have been classified as Level 2 and are valued based on the principles of fair valuation through appropriate valuation policies and procedures.

Central government and state government securities are valued based on the aggregated prices provided by CRISIL & ICRA Limited. The inputs that are significant to valuation are generally observable. Central government and state government securities which are listed have been classified as Level 2.

The following table shows financial instruments recognised at fair value as at March 31, 2026 and March 31, 2025:

Particulars	LIC MF Technology Fund							
	As at March 31, 2026				As at March 31, 2025			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Equity shares	2,877.80	-	-	2,877.80	NA	NA	NA	NA

The below table shows the carrying amount of financial assets and financial liabilities other than those carried at FVTPL:

Particulars	LIC MF Technology Fund			
	As at March 31, 2026		As at March 31, 2025	
	Amortized cost	Total	Amortized cost	Total
Financial assets:				
Cash and cash equivalents*	4,673.12	4,673.12	NA	NA
Bank balance other than cash and cash equivalents*	400.30	400.30	NA	NA
Other financial assets*				
Others	50.00	50.00	NA	NA
Total	**5,123.42**	**5,123.42**	**NA**	**NA**
Financial liabilities:				
Payables				
Redemption payable	0.89	0.89	NA	NA
Contract for purchase of investments	371.65	371.65	NA	NA
Other payables	0.10	0.10	NA	NA
Other financial liabilities**				
Management fee payable	2.69	2.69	NA	NA
Commission to distributors payable	4.45	4.45	NA	NA
Others	26.53	26.53	NA	NA
Total	**406.31**	**406.31**	**NA**	**NA**

* Cash and cash equivalents, bank balance other than cash equivalents and other financial assets are carried at amortized cost which is a reasonable approximation of its fair value largely due to the short term maturities of these instruments. Accordingly, fair value hierarchy for these financial instruments have not been presented above.

** Other financial liabilities are carried at amortized cost which is a reasonable approximation of its fair value.

For all other financial assets and liabilities, the carrying value is an approximation of fair value, including: cash and cash equivalents; balances with banks; receivables and other finanical assets; payables and other financial liabilities.

There have been no transfers between Level 1, Level 2 and Level 3 for the year ended March 31, 2026 and March 31, 2025.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

36 Financial risk management

The Fund's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk.

The Fund's AMC has overall responsibility for the establishment and oversight of the Fund's risk management framework. The Fund's risk management policies are established to identify and analyses the risks faced by the Fund, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Fund's activities. The Fund's Trustees quarterly monitors compliance with the Fund's risk management practices and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Fund which are summarised below.

The Fund uses different methods to measure and manage the various types of risk to which it is exposed; these methods are explained below:

i) Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows related to financial instrument that may result from adverse changes in market rates and prices (such as foreign exchange rates, interest rates, other price risks). The Fund is exposed to market risk primarily related to price risk, currency risk, and interest rate risk.

a) Price risks

Price risk is the risk that the fair value of the future cashflows of the financial instrument will fluctuate as a result of changes in market prices and related market variables whether caused by factors specific to an individual investment, its issuer or the market.

The Fund's exposure to price risk arises from investments in asset type mentioned below which are classified as financial assets at fair value through profit and loss. The following is the Fund's exposure to price risk:

Particulars	LIC MF Technology Fund	
	As at March 31, 2026	As at March 31, 2025
Equity shares	2,877.80	NA

The manager mitigates the risk through the use of investment strategies that seek to minimise the Fund's tracking error as compared to market indicies with the parameters of investment strategy. The maximum exposure resulting from investment in financial instrument is its fair value. In practice, actual results may differ from this sensitivity analysis and the difference could be material. The table below summarises the sensitivity of the Fund's net assets attributable to holders of redeemable units to price movements:

Scheme	Effect on net assets attributable to redeemable units of an increase in price by 5% for Equity securities and 0.5% Debt securities		Effect on net assets attributable to redeemable units of a decrease in price by 5% for Equity securities and 0.5% Debt securities	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Technology Fund	144.02	NA	(144.02)	NA

(b) Foreign exchange risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk arises from recognised financial assets and liabilities denominated in a currency that is not its functional currency (Indian Rupees). The Fund is exposed to the risk that the value of securities denominated in other currencies will fluctuate due to changes in exchange rates. The Fund may enter into foreign exchange forward contracts to reduce its foreign currency exposure. Foreign exchange risk is NIL as at March 31, 2026 and March 31, 2025 as the Fund does not have any foreign currency exposure.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund manager regularly assesses the economic condition, monitor changes in interest rates outlook and take appropriate measures accordingly to control the impact of interest rate risk.

The majority of the Fund's financial assets are corporate bond, certificates of deposit, commercial paper, state government securities and central government securities, which are interest bearing.

As at March 31, 2026, if prevailing interest rates had risen or declined by 0.5%, assuming a parallel shift in the yield curve with all other variables held constant, the Fund's net assets would have decreased or increased, respectively as mentioned in the below table. In practice, actual results may differ from this sensitivity analysis and the difference could be material.

Scheme	Effect on net assets attributable to redeemable units of an increase in interest rate by 0.5%		Effect on net assets attributable to redeemable units of a decrease in interest rate by 0.5%	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
LIC MF Technology Fund	0.13	NA	(0.13)	NA

The following table analyses the Fund's interest rate risk exposure. The Fund's assets and liabilities are included at their carrying amount and categorised by the earlier of contractual re-pricing or maturity dates:

Particulars	LIC MF Technology Fund					
	0-3 months	3-6 months	6 months-1 year	1-5 years	More than 5 years	Total
As at March 31, 2026						
Fixed rate assets						
Cash and cash equivalents	4,673.12	-	-	-	-	4,673.12
Total interest bearing assets	**4,673.12**	**-**	**-**	**-**	**-**	**4,673.12**

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

ii) Credit risk

Credit risk is the risk that the Fund will incur a loss because its counterparties fail to discharge their contractual obligations. The Fund is exposed to the risk of credit related losses that can occur as a result of a counterparty or issuer being unable or unwilling to honour its contractual obligations.

The AMC's policy is to closely monitor the creditworthiness of the Fund's counterparties by reviewing their credit ratings, Financial Statements and press releases on a regular basis.

a) *Credit quality analysis*

The Scheme's exposure to credit risk arises in respect of the following financial instruments:

- Cash and cash equivalents
- Contract for sale of investment in securities and Derivative financial instruments receivable
- Securities Lending and Borrowing (SLB)
- Investments in debt and money market securities; and
- Derivative assets

Cash and cash equivalents

The cash and cash equivalents are held with bank and deployed in tri-party repo which are generally highly rated based on ratings provided by rating agencies.

Contract for sale of investment in securities and derivative financial instruments receivable

Contract for sale of investment in securities and derivative financial instruments receivable represent margin accounts and sales transactions awaiting settlement. Credit risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used. As at the reporting date, NIL (March 31, 2025: NIL) contracts for sale of investment in securities and derivative financial instruments receivable.

Securities lending and borrowing

There are no security lending and borrowing for the year ended March 31, 2026.

Investments in debt and money market securities

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

Derivatives

Nil derivative assets and derivative liabilities outstanding as at March 31, 2026.

b) *Concentration of credit risk*

The AMC reviews the credit concentration of debt and money market securities held based on counterparties and industries.

As at the reporting date, the Scheme's debt and money market securities exposures concentrated in industries:

For the year ended March 31, 2026: Nil

For the year ended March 31, 2025: Nil

There were no significant concentrations in the debt and money market securities portfolio of credit risk to any individual issuer or group of issuers at March 31, 2026 and March 31, 2025.

c) *Collateral and other credit enhancements, and their financial effect*

The Scheme mitigates the credit risk of derivatives and securities lending and borrowing by entering into master agreements and holding collateral in the form of marketable securities - NIL

Derivatives

The Scheme may use derivatives instruments like interest rate swaps or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the SEBI Regulations and guidelines. Usage of derivatives will expose the Schemes to risk inherent to such derivatives e.g. when a credit event such as a default occurs - all outstanding transactions under the agreement with the counterparty are terminated, the termination value is assessed and only a single net amount is payable in settlement of all transactions with the counterparty.

The derivatives are entered into with bank and financial institution counterparties, which are rated, based on ratings provided by credit rating agencies.

Securities lending and borrowing

There are no security lending and borrowing for March 31, 2026 and March 31, 2025.

d) *Expected credit loss principles*

For purposes of impairment assessment, the Funds' assets which are measured at amortised cost are considered to have low credit risk as they are not due for payment at the end of the reporting period and there has been no significant increase in the risk of default on the receivables since initial recognition. Accordingly, for the purpose of impairment assessment for these receivables, the loss allowance is measured at an amount equal to 12-month expected credit losses ("ECL"). The ECL for these assets as at the end of the reporting period is not significant.

The main concentration of credit risk to which the Fund is exposed arises from the Fund's investments in corporate bond, certificates of deposit, commercial paper. These classes of financial assets are not subject to IND AS 109's impairment requirements as they are measured at FVTPL. Hence, no separate maximum exposure to credit risk disclosure is provided for these instruments.

iii) Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Fund's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Fund's reputation.

The responsibility for liquidity risk management rests with the AMC and the Trustees, who has established an appropriate liquidity risk management framework for the management of the Fund's short-term, medium-term and long-term funding and liquidity management requirements. The fund manages liquidity risk by maintaining adequate reserves, banking facilities and by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

The following table shows the maturity analysis of financial liabilities of the Fund based on contractually agreed undiscounted cash flows:

Particulars	LIC MF Technology Fund				
	0-3 months	3-6 months	6 months - 12 months	After 12 months	Total
As at March 31, 2026					
Non-derivative financial liabilities					
Payables	372.64	-	-	-	372.64
Other financial liabilities	33.67	-	-	-	33.67
	406.31	**-**	**-**	**-**	**406.31**

The table above shows the undiscounted cash flows of the Scheme's financial liabilities on the basis of their earliest possible contractual maturity. The Scheme's expected cash flows on these instruments do not vary significantly from this analysis.

For derivative financial instruments, the inflow/ (outflow) disclosed in the table represents the contractual undiscounted cash flows relating to these instruments. The disclosure shows net cash flow amounts for derivatives that are net cash-settled and gross cash inflow and outflow amounts for derivatives that have simultaneous gross settlement - e.g. interest rate swaps.

37 Offsetting financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. The Scheme has not offset any financial assets and financial liabilities during the year.

38 Maturity analysis of assets and liabilities

The table below shows an analysis of assets and liabilities according to their maturity profile.

Particulars	LIC MF Technology Fund

Investments are readily realisable. For the purpose of this disclosure, management has estimated the amounts and disclosed accordingly. Further, the fund cannot estimate the timing of settlement of net assets attributable to holder of redeemable units.

LIC MUTUAL FUND

Notes to Financial Statements as at March 31, 2026

(All amount in lakhs, unless otherwise stated)

39 Capital management

Unitholders are entitled to receive proceeds of the NAV per unit of that Fund for all or any of the units of such unitholder. The units are redeemable for cash equal to a pro rata share of the Fund's series NAV. Upon issue and redemption of units, the net premium or discount to the face value of units is adjusted against the unit premium reserve of each option, after an appropriate portion of the issue proceeds and redemption payouts is credited/ debited to the equalisation account.

The Fund may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

40 Events after reporting period

There are no events after the reporting period to be disclosed.

41 The above financials have been reviewed by the Audit Committee and approved by the Board of Directors of the company, at their meeting held on June 30, 2026.

42 As this is the first Financial Statements for LIC MF Technology Fund, there are no comparative figures for the previous year/ period for those Schemes.
